1 Instructions to the Reader

The guidelines given below are followed throughout the document. For a better understanding of the document, go through the instructions below.

- It is mandatory to execute the steps given in a numbered list to achieve the expected result.
- Steps in a bulleted list explain the optional or additional menu elements.
- Hyperlinks are used in the document to explain the optional menu elements. Click the hyperlink will navigate you to the corresponding screen.
- Commonly used GUI elements such as the Search box and Apply button is explained in a separate heading to avoid content repetition. For more information, refer to [Commonly used GUI elements](#).

2 Introduction

Billing & Invoicing module follows the process of aggregating the events from respective network nodes for rating and charging functions at regular intervals for Subscribers and Enterprises Accounts.

These events can be Recurring, Non-Recurring, and One-time events. Based on the chargeable events and account profile module also supports Discounts and Carry Forward Over dues, if any. Taxation is applicable as per the local Authority Regulations.

Billing integrates all service charges onto a single customer invoice and a unified view of the customer. Customers should call a call center and should get complete account information for all the services opted for. The customer receives a single bill and makes a single payment for all the services.

A true Billing System should be able to consolidate any number and combination of products and services onto a single bill, regardless of the type of product and market segment, for example, prepaid and postpaid services.

Billing is the process of tracking and pricing the customer's usage. A bill can be generated based on the customer's demand and according to the customer's bill cycle. Billing supports the addition of late fees (fixed or percentage).

3 Logon the Application

All applications are integrated with Single Sign On (SSO). You log in to the SSO with the provided URL and select the Billing application.

To logon to the GUI:

2. Enter the URL (found in the release notes) in the web browser. The log-in screen will be displayed.

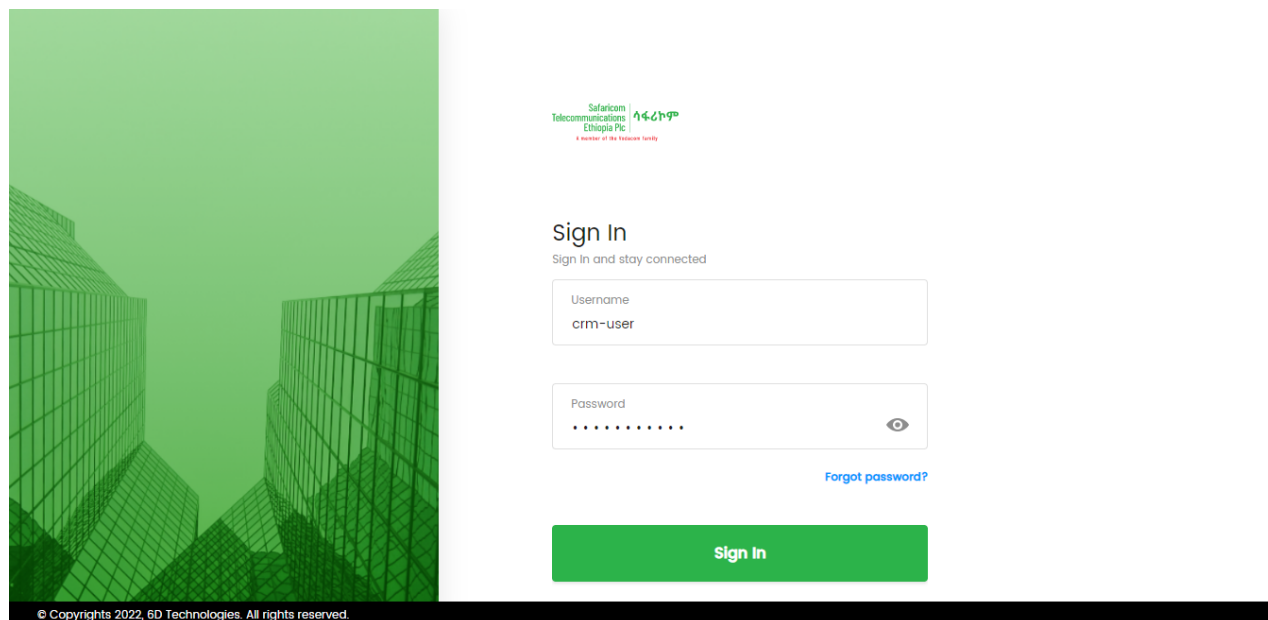

Figure 1 Billing Login Screen

3. Enter your **Username** and **Password** in the corresponding fields.
- Click the **Eye** button  to view the entered credentials.

4. Click the **Sign In** button, and the following SSO screen is displayed.

Figure 2 Applications- SSO Page

- Click the **Go To Applications** hyperlink to navigate to the CRM GUI. Refer to the following screen.

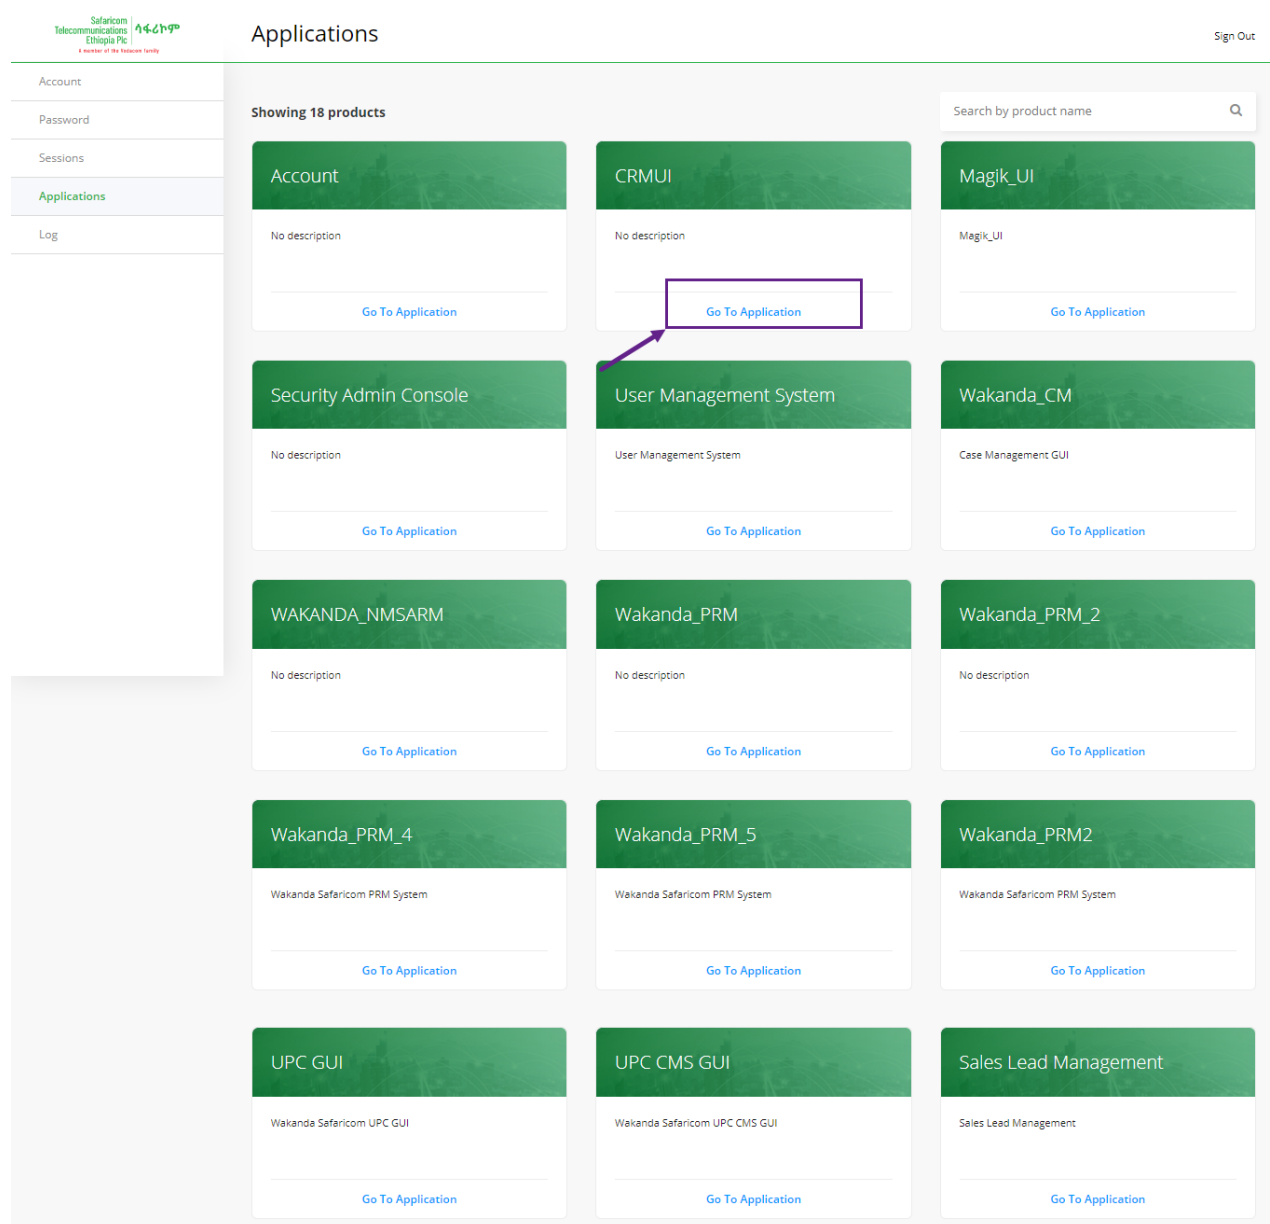

Figure 3 Applications – CRM (Go To Application)

6. After clicking the **Go To Applications**, the Home Page will be displayed.

The home screen displays the side menu bar, as shown in the following screen:

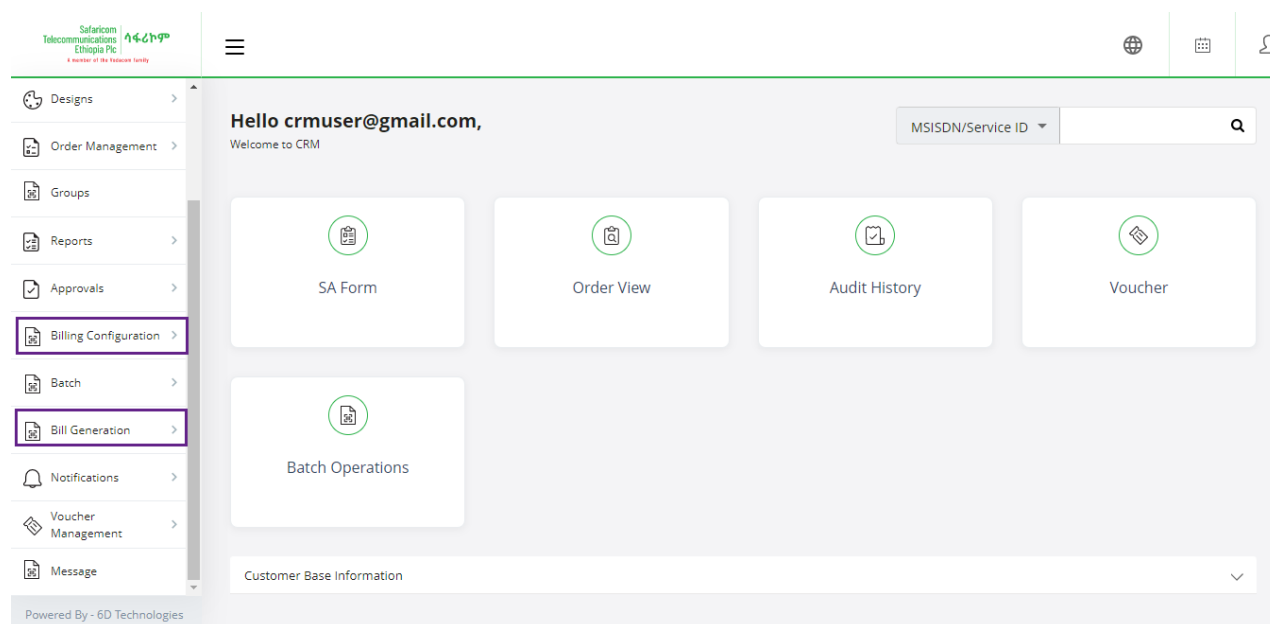

Figure 4 CRM Home Screen

The following billing menus are highlighted in the previous screen.

- Bill Generation
- Billing Configuration

4 Commonly used GUI elements

The following screens depict the most used GUI elements and their explanation.

- Click  to view hide or show and their menus. Refer to the following screen.

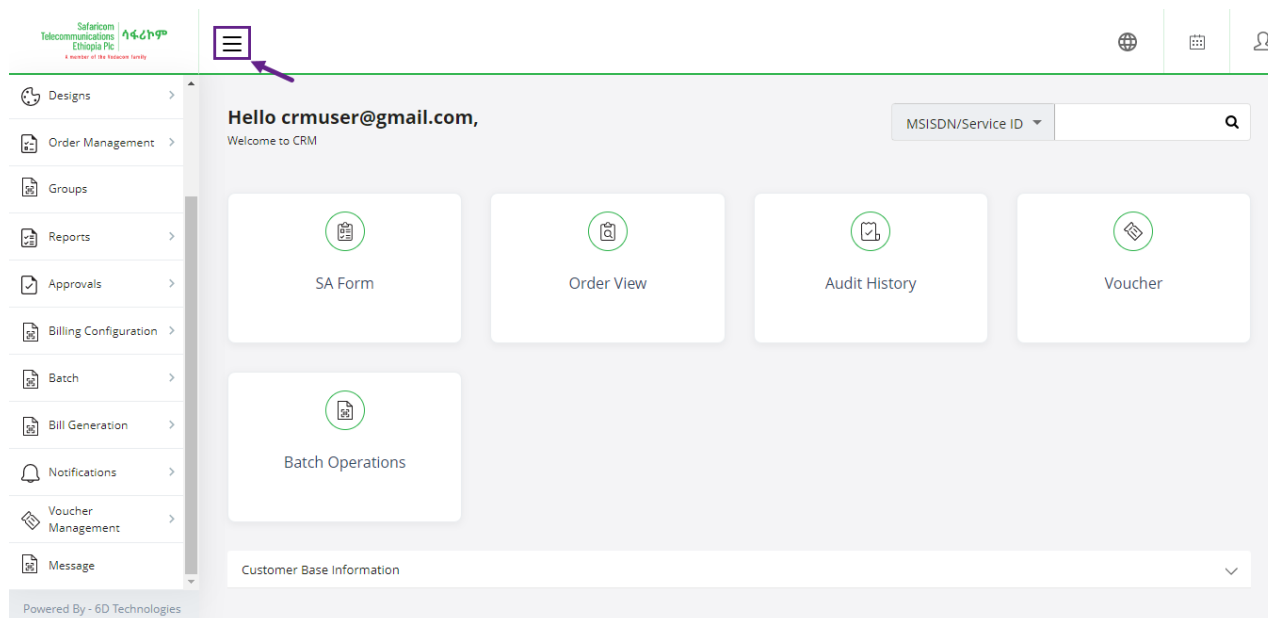

Figure 5 Hide/Show Button

- Click  to view the headers to be displayed for the corresponding menus. Refer to the following screen.

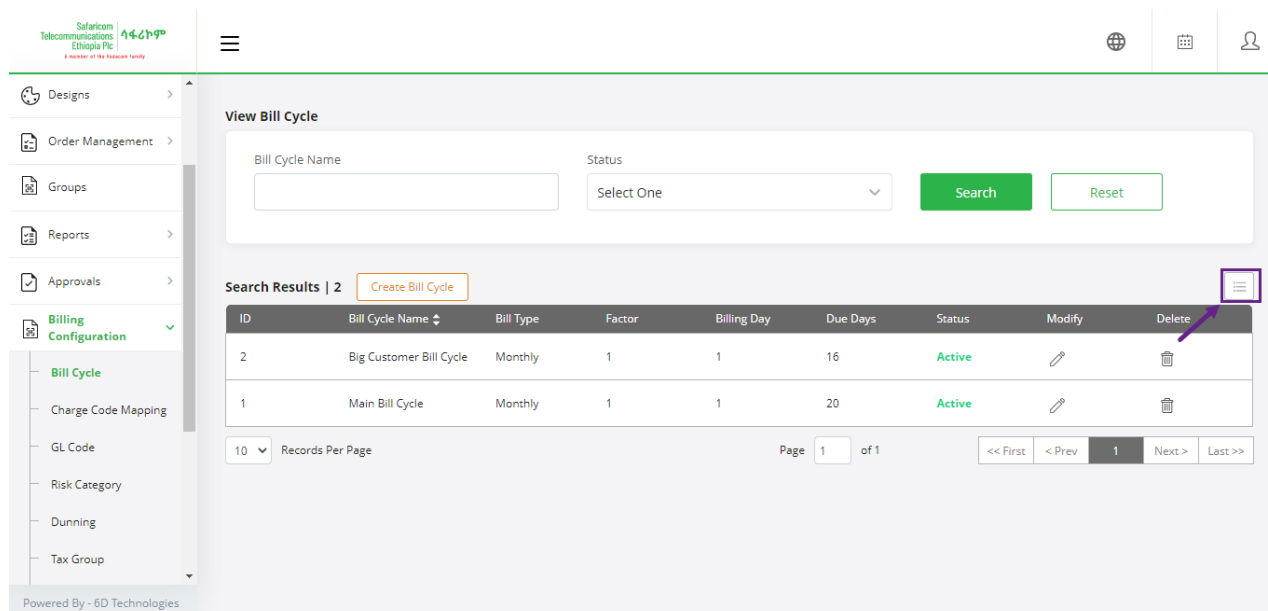

Figure 6 Display Headers

- Click the **Reset** button to reset the inputs. Refer to the following screen.

The screenshot shows the 'View Bill Cycle' interface. On the left is a sidebar with navigation items: Designs, Order Management, Groups, Reports, Approvals, and Billing Configuration (which is expanded to show Bill Cycle, Charge Code Mapping, GL Code, Risk Category, Dunning, and Tax Group). The main area has a header with 'Safaricom Telecommunications Ethiopia Plc' and a menu icon. Below the header, there's a 'View Bill Cycle' section with a form containing 'Bill Cycle Name' (a text input), 'Status' (a dropdown menu showing 'Select One'), a green 'Search' button, and a green 'Reset' button. A purple box highlights the 'Reset' button, and a purple arrow points to it. Below the form, there's a 'Search Results | 2' section with a 'Create Bill Cycle' button. It contains a table with columns: ID, Bill Cycle Name, Bill Type, Factor, Billing Day, Due Days, Status, Modify, and Delete. The table has two rows: ID 2, 'Big Customer Bill Cycle', Monthly, Factor 1, Billing Day 1, Due Days 16, Status Active; and ID 1, 'Main Bill Cycle', Monthly, Factor 1, Billing Day 1, Due Days 20, Status Active. At the bottom, there's a pagination bar showing '10' records per page, 'Page 1 of 1', and navigation buttons: '<< First', '< Prev', '1', 'Next >', and 'Last >>'.

Figure 7 Bill Cycle – Reset Button

5 Log off from the Application

To log off from the GUI:

1. On the upper-right corner of the screen, click the **User Icon**  drop-down list to view the logout option. Refer to the following screen.

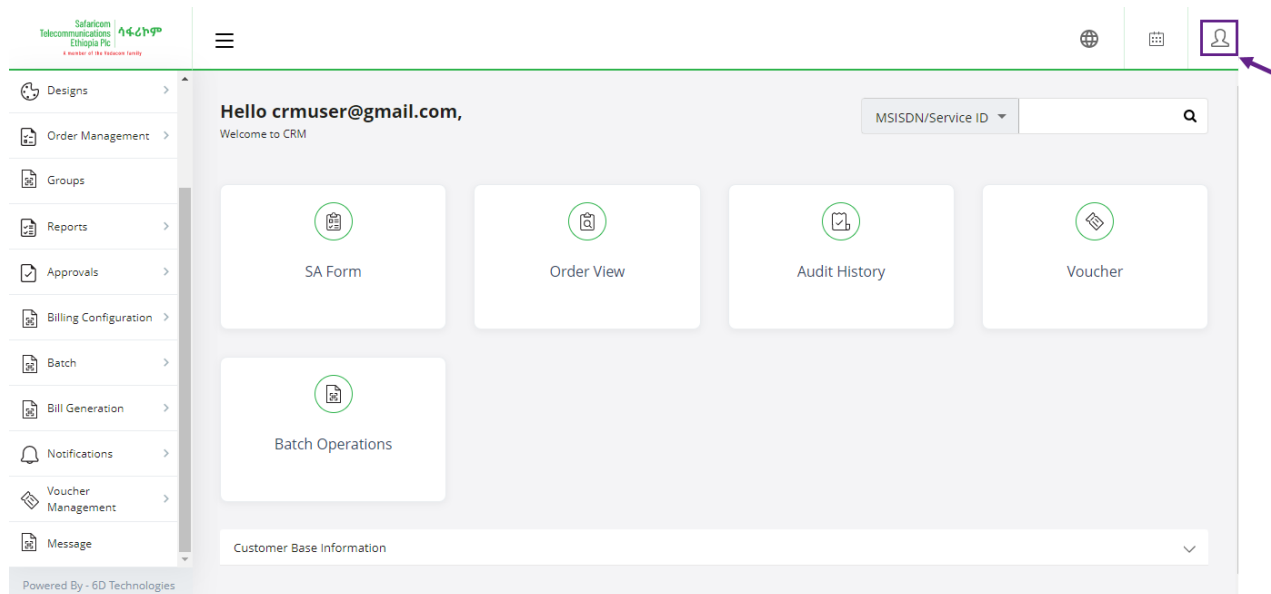

Figure 8 User Icon Menu

7. After clicking the **User Icon** drop-down list, the following screen will be displayed.

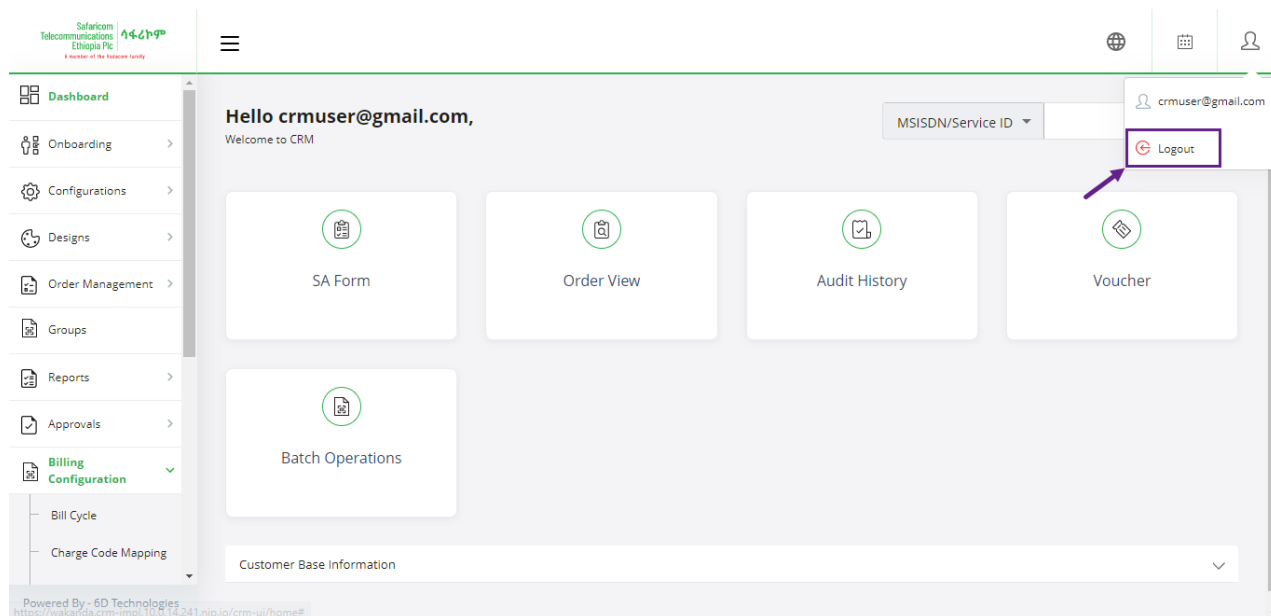

Figure 9 User Icon - Logout Button

8. Click the **Logout** button to logout of the application at any time. Refer to the previous screen.

6 Bill Generation

Using this module, you can access the following options:

- Bill Cycle
- Bill Run
- Bill Confirm
- View Test Bill
- PDF Generation

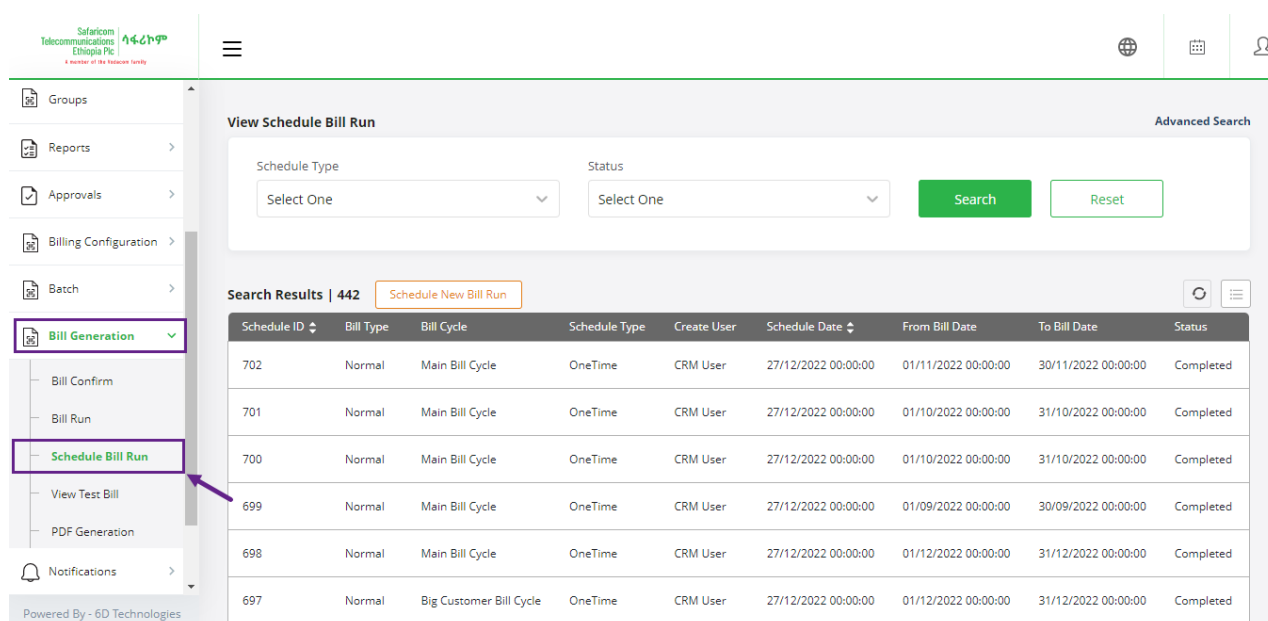

The first step is to configure a bill cycle.

6.1 Schedule Bill Run

You can schedule the Bill cycle to run once or recurrently based on the operator's requirement. Using this schedule bill run option, you can manage the bill run. That is, you can schedule bill cycles, view scheduled bill cycles, and delete scheduled bill cycles.

To manage bill run:

1. On the side menu, select **Bill Generation** >> **Schedule Bill Run** to view the schedule bill run details. Refer to the following screen.

View Schedule Bill Run Advanced Search

Schedule Type: Status: Search Reset

Figure 24 Bill Run Details

- You can view the details such as **Bill Run ID, Type, Bill Cycle, Schedule ID, Status, From Date, To Date, and Bill Run Date.**

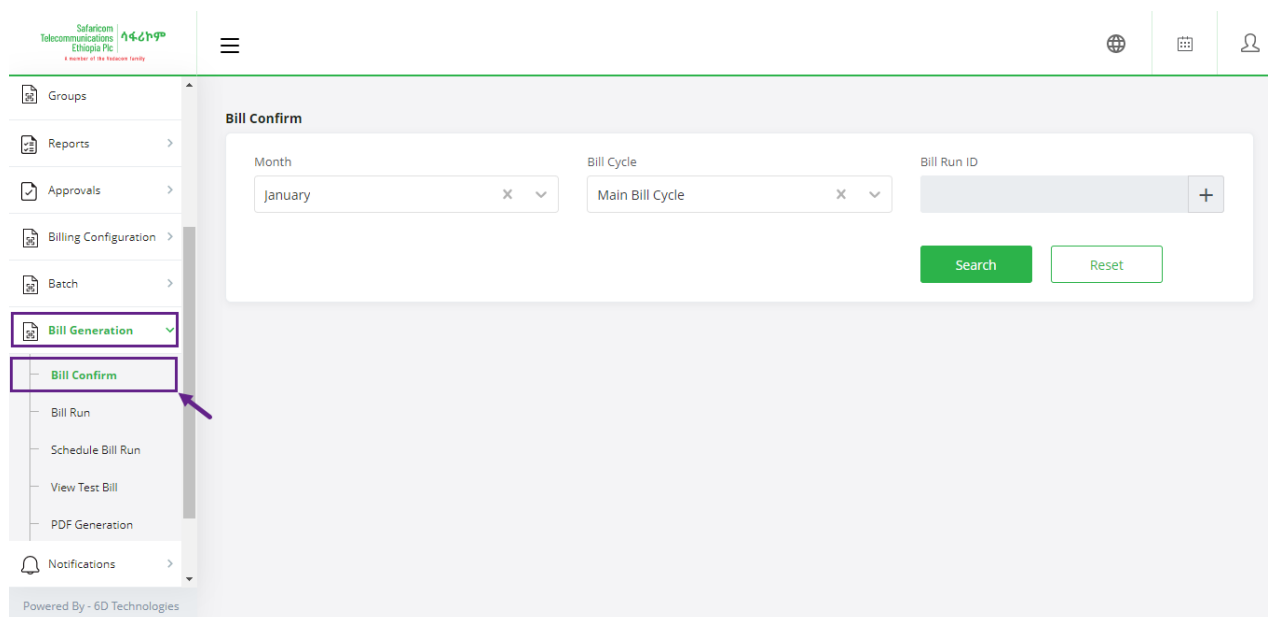

6.3 Bill Confirm

Using this option, you can confirm the invoices under the bill run.

After the invoice is confirmed, it is generated for the customer and internally accounted for in the system. The outstanding balance of the billing account will be changed as per the invoice.

To confirm bill runs:

1. On the side menu, select **Bill Generation >> Bill Confirm** to view the bill confirm details. Refer to the following screen.

The screenshot displays the 'Bill Confirm' screen within the Safaricom Ethiopia system. On the left, a sidebar menu lists various functions, with 'Bill Generation' and its sub-item 'Bill Confirm' highlighted in green. The main content area features a 'Bill Confirm' form. This form includes three input fields: 'Month' (currently showing 'January'), 'Bill Cycle' (currently showing 'Main Bill Cycle'), and 'Bill Run ID' (which is empty and has a '+' icon to its right). Below these fields are two buttons: a green 'Search' button and a light green 'Reset' button. The top of the interface shows the Safaricom Ethiopia logo and several user-related icons (globe, calendar, and profile).

Figure 25 Bill Generation – Bill Confirm

14. Select the **Month** or **Bill Cycle** in the corresponding drop-down lists. Click the **Search**. The scheduled bill runs for the selected criteria are displayed on the screen.

6.5 PDF Generation

Using this PDF Generation option, you can generate the PDF for the selected bill cycles. The following are the different stages of PDF generation:

- Pending PDF Generation
- In- Progress PDF Generation
- PDF Generated

You can view the Bill IDs pending for the PDF generation under the Pending PDF Generation. Once you change the status of the Bill Run ID under the Pending PDF Generation tab, the status of the Bill ID is changed from **"Pending"** to **"In-Progress"**. Once the PDF is generated, the status of the Bill ID is changed from **"In-Progress"** to **"Generated"**.

To manage the PDF Generation:

1. On the side menu, select **Bill Generation >> PDF Generation** to generate the PDF. Refer to the following screen.

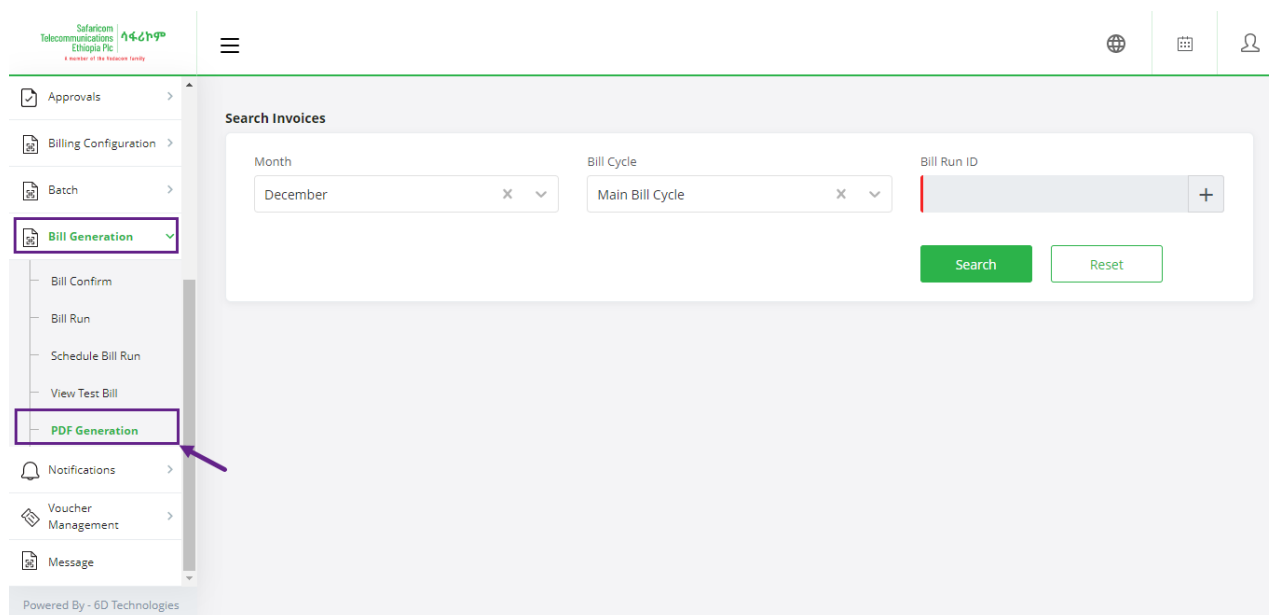

Figure 29 Bill Generation – Pdf Generation

17. Select the **Month** and the **Bill Cycle** in the corresponding drop-down lists.

18. Click the **Add** button  select the Bill Run ID. Refer to the following screen.

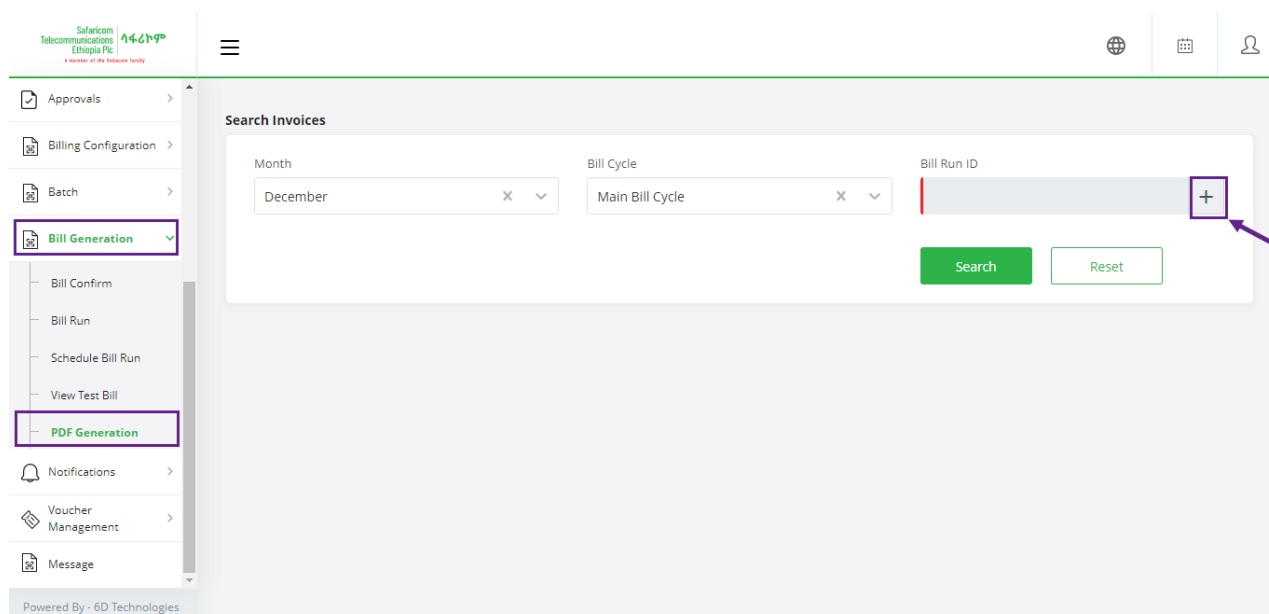

Figure 30 PDF Generation – Add Button

19. After clicking the **Add** button, the following screen is displayed.

7 Billing Configuration

Using this module, you can configure the following parameters:

- Bill Cycle
- Charge Code Mapping
- GL Code
- Risk Category
- Dunning
- Tax Group
- Tax Details

7.1 Bill Cycle

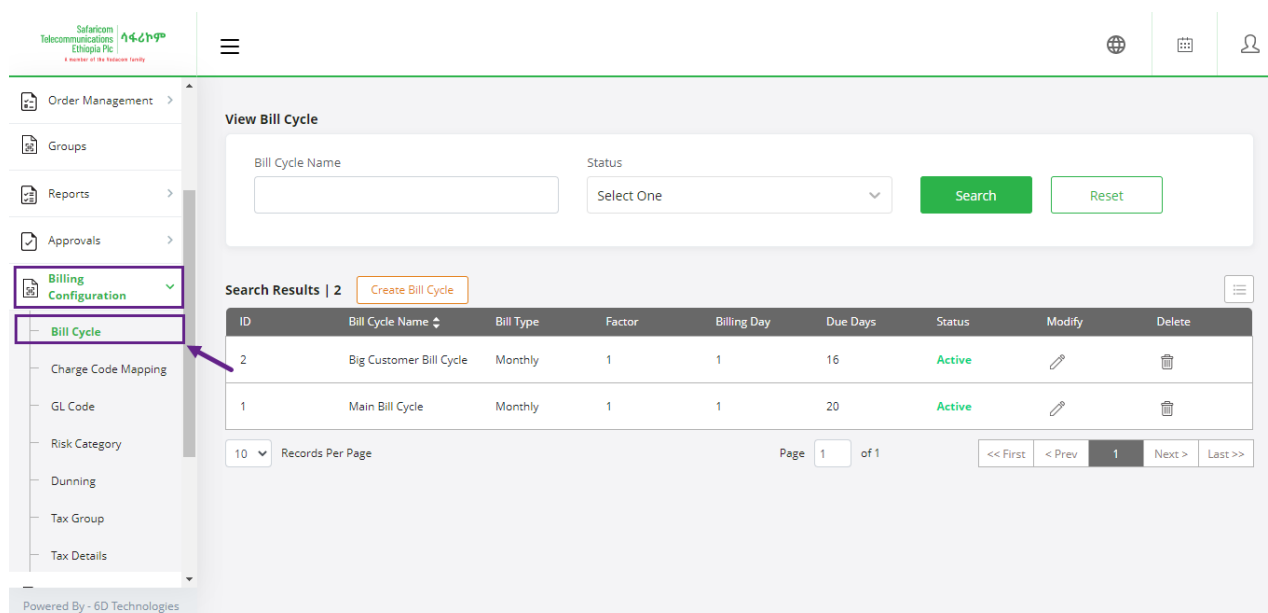

When a customer is added to the Billing System, the customer is assigned a predefined Bill Cycle. A bill cycle is a date on which bills are produced for a set of customers.

Many customers can be divided into different billing cycles if there are many customers. For example, a group of customers can have billing dates as the 5th of every month; another group can have the billing date as the 10th of every month.

Using this Bill Cycle option, you can manage bill cycles. That is, you can configure, view, and modify bill cycles.

To manage bill cycles:

1. On the side menu, select **Billing Configuration>> Bill Cycle** to view the bill cycle details. Refer to the following screen.

View Bill Cycle

Bill Cycle Name: Status: Select One Search Reset

Search Results | 2 Create Bill Cycle

ID	Bill Cycle Name	Bill Type	Factor	Billing Day	Due Days	Status	Modify	Delete
2	Big Customer Bill Cycle	Monthly	1	1	16	Active

Figure 37 Billing Configuration – Bill Cycle

7.1.1 Add Bill Cycle

Using this add option, you can add a new bill cycle.

To add a new bill cycle:

1. On the **View Bill Cycle** screen, click **Create Bill Cycle** button to add a new bill cycle. Refer to the following screen.

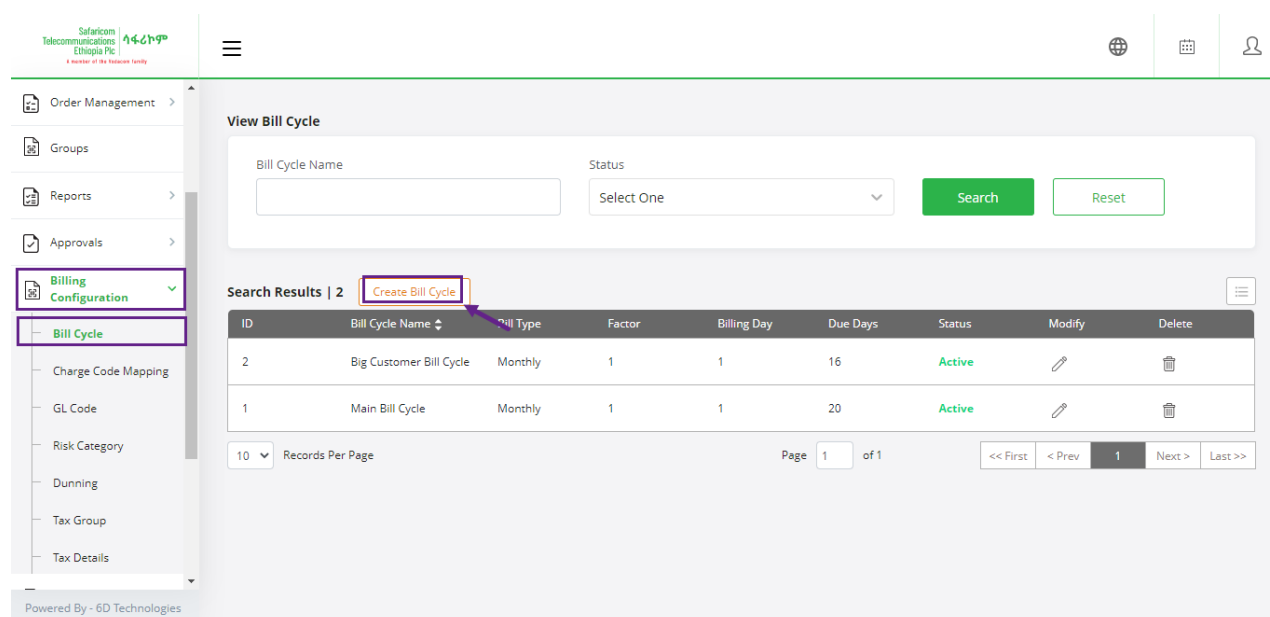

Figure 38 View Bill Cycle- Create Bill Cycle Button

26. After clicking the **Create Bill Cycle** button, the following pop-up window will be displayed.

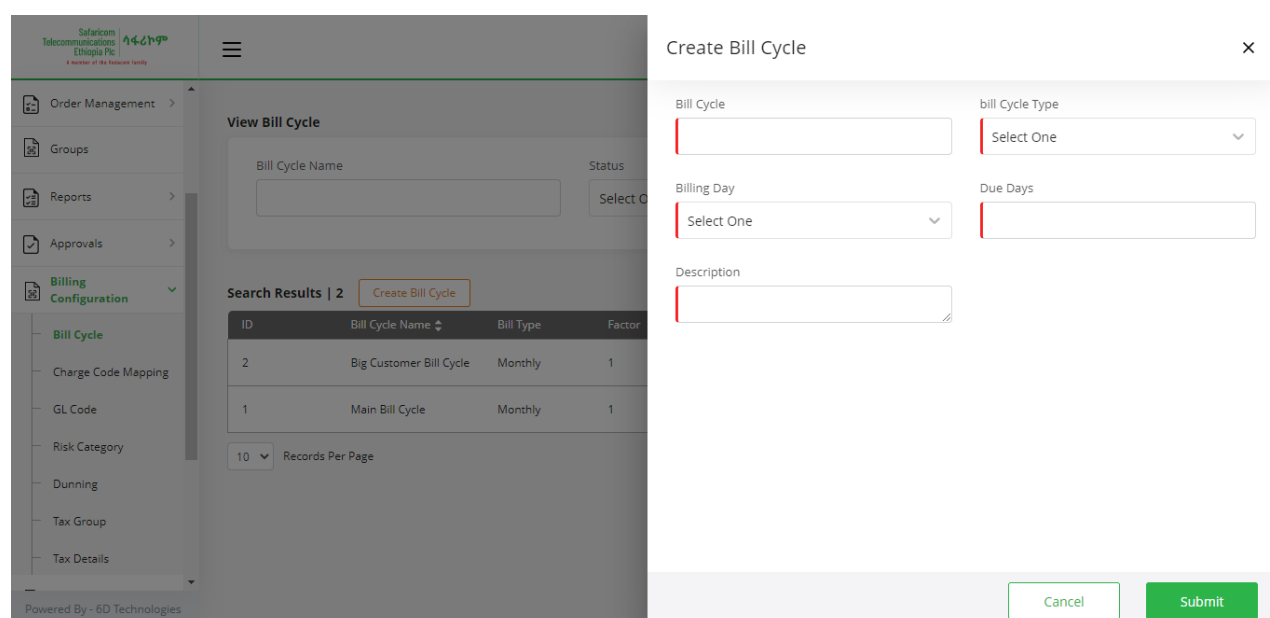

Figure 39 Create Bill Cycle Input Screen

Note: Enter or select the following information in the corresponding fields. If fields marked with "!" are mandatory.

- **! Bill Cycle** – Enter the name with which the bill cycle is identified. For example, you can enter the Bill Cycle as **"Individual-28thMonthlyBill"**.

- **Bill Cycle Type** – Select the bill cycle type in the drop-down list. This should be “**Monthly**” by default.
- **Billing Day** – Select the day the bill should be generated.
- **Due Days** – Enter the number of days after which the invoice should be paid.
- **Description** – Enter a short description of the bill cycle.

27. After providing the required details, click the **Submit** button to save the changes.

A confirmation message will be displayed, indicating that the bill cycle is created successfully.

7.1.2 Modifying Bill Cycle

Using this option, you can modify the existing bill cycle.

To modify the bill cycle:

1. On the **View Bill Cycle** screen, click the **Modify** button  to modify the bill cycle details. Refer to the following screen.

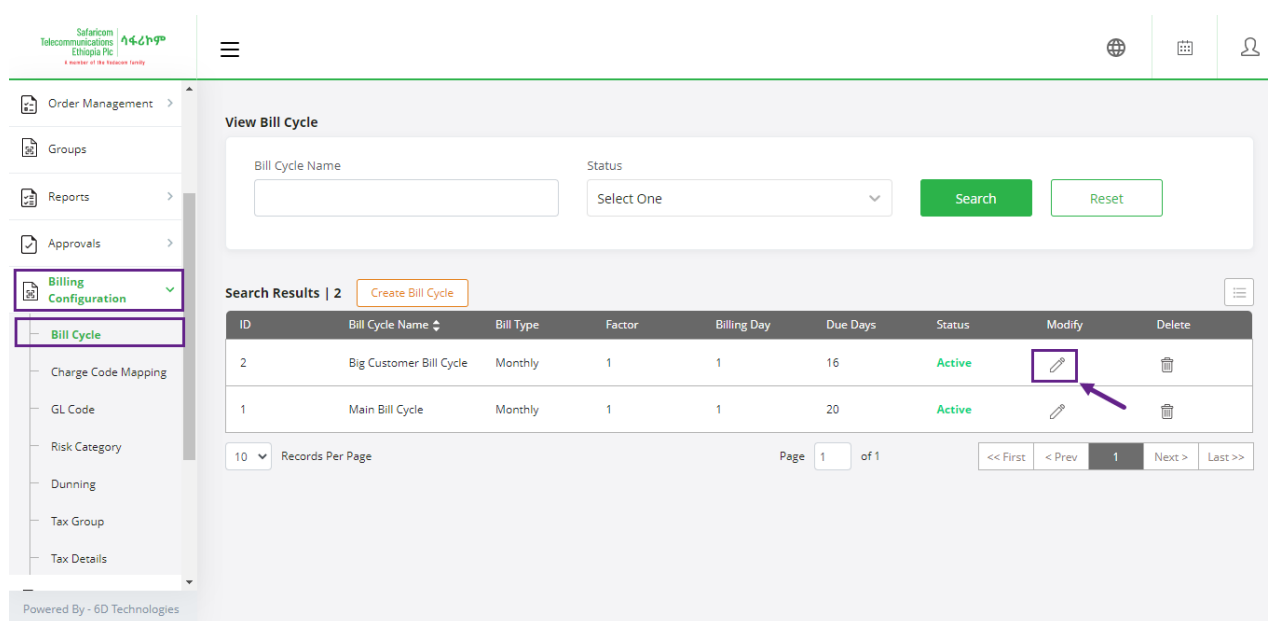

Figure 40 View Bill Cycle – Modify Button

28. After clicking the **Modify** button, the **Modify Bill Cycle** screen is displayed.

29. Modify all the fields on this screen.

30. Click **Submit**.

A success message is displayed, indicating that the bill cycle is modified successfully.

7.1.3 Delete Bill Cycle

Using this delete option, you can delete the existing bill cycle.

To delete a bill cycle:

1. On the **View Bill Cycle** screen, click the **Delete** button  to delete the bill cycle details. Refer to the following screen.

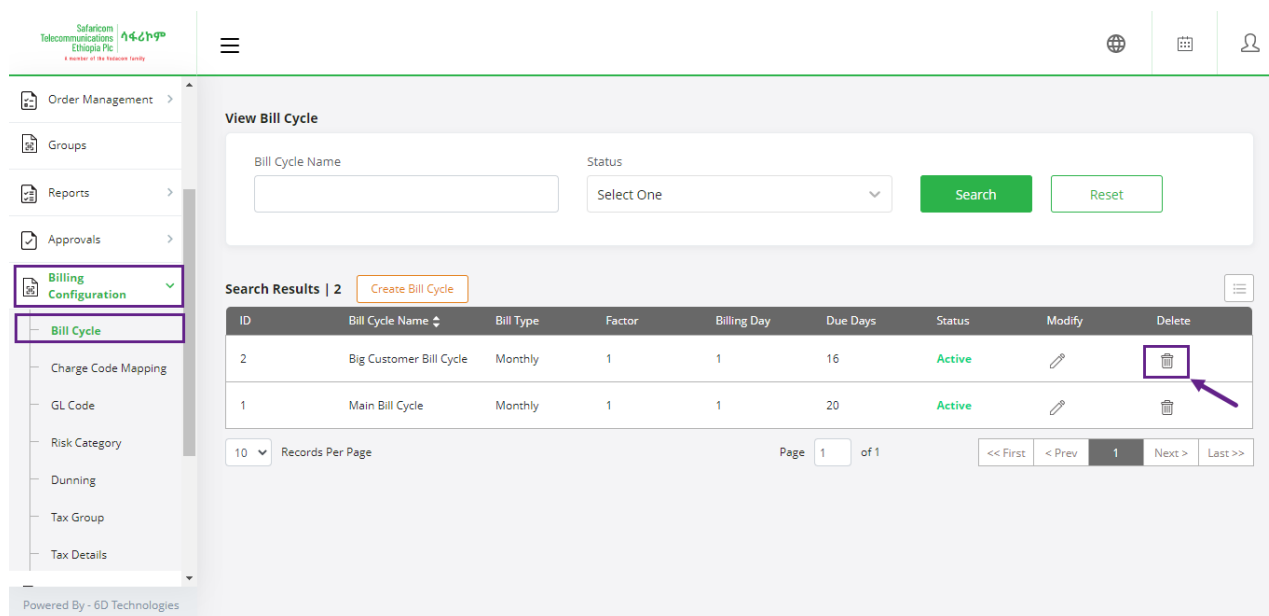

Figure 42 Bill Cycle- Delete Button

31. After clicking the **Delete** button, the following pop-up window will be displayed.

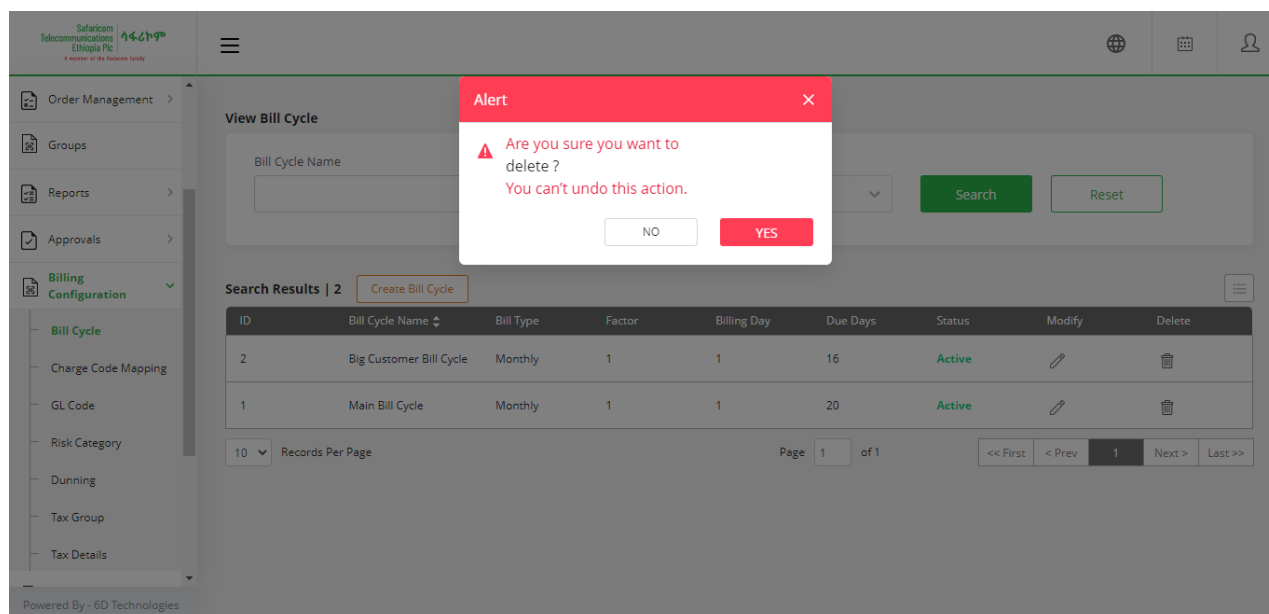

Figure 43 Delete Bill Cycle- Confirmation Dialog

32. If you receive the message, “**Are you sure you want to delete? You can’t undo this action**”, click the “**Yes**” button to confirm the action.

A confirmation message will be displayed, indicating that the bill cycle is deleted successfully.

Or

Click “**No**” to cancel the action.

7.2 Dunning

- Dunning is a part of the collection that involves communicating with the customer regarding the dues to be paid by the customer. When a customer uses the services and does not pay the bill, certain actions can be taken. For example, you can gently remind the customer that the bill has not been paid.
- Depending on the customer's risk category, you can configure the dunning schedule.
- In some instances, dunning restricts the customer from availing of the services (for example, outgoing calls can be barred) if the customer has not cleared the invoice dues by the payment due date.
- The customer can avail of the registered services on clearing the due amount.
- Dunning is performed at the invoice account level. The dunning actions will affect all the service accounts under the invoice account.
- If the customer does not make the payment by the due date, the system initiates predefined dunning bar actions on the specific invoice account.

To manage the dunning configuration:

1. On the side menu, select **Billing Configuration >> Dunning** to view the dunning details. Refer to the following screen.

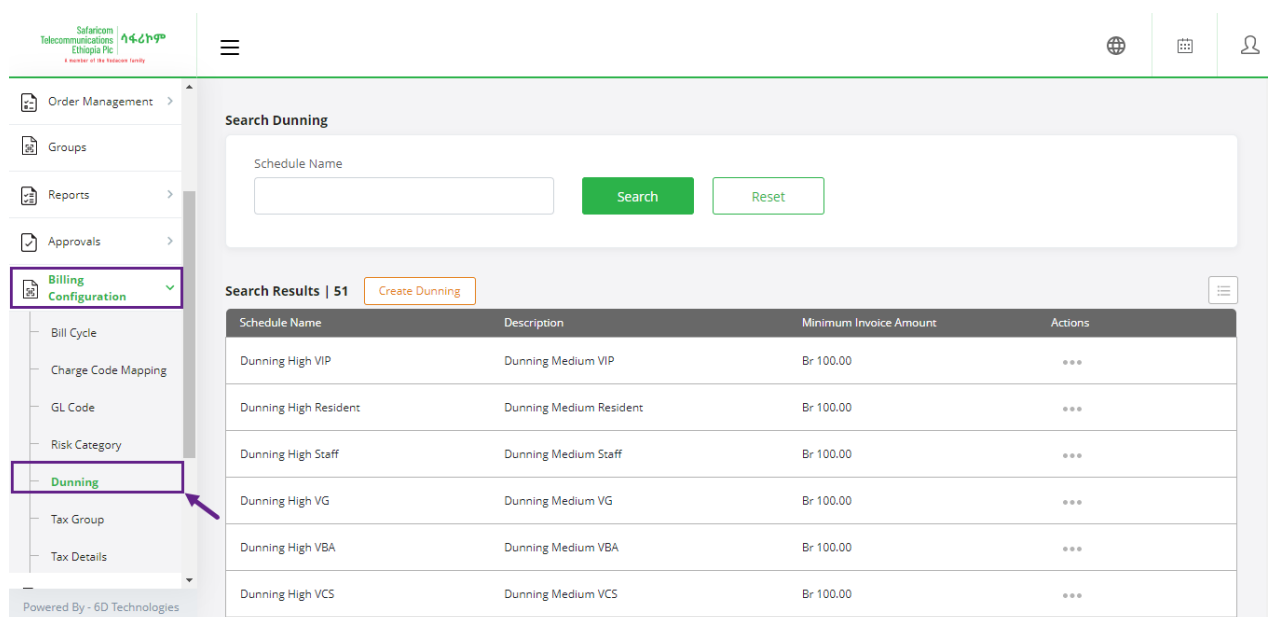

Figure 44 Billing Configuration- Dunning

7.2.1 Create Dunning

- Using this option, you can create a dunning schedule. The dunning schedule is a list of actions to be performed on an invoice account, in case of non-payment of a bill, on (or) before the due date by the customer.
- The system allows the setting up of multiple dunning schedules, although only one schedule can be attached to a Billing account at a time.
- The dunning schedule has predefined actions and alerts triggered on the configured threshold days when the outstanding amount for an invoice is not paid within the configured threshold number of days.

To configure the dunning:

1. On the **Dunning** screen, click the **Create Dunning** button to add a new dunning configuration. Refer to the following screen.

Schedule Name	Description	Minimum Invoice Amount	Actions
Dunning High VIP	Dunning Medium VIP	Br 100.00	...
Dunning High Resident	Dunning Medium Resident	Br 100.00	...
Dunning High Staff	Dunning Medium Staff	Br 100.00	...
Dunning High VG	Dunning Medium VG	Br 100.00	...
Dunning High VBA	Dunning Medium VBA	Br 100.00	...
Dunning High VCS	Dunning Medium VCS	Br 100.00	...

Figure 45 Dunning Configuration – Create Dunning

33. After clicking the **Create Dunning** button, the following screen is displayed.

Figure 46 Dunning Configuration- Dunning Profile Details

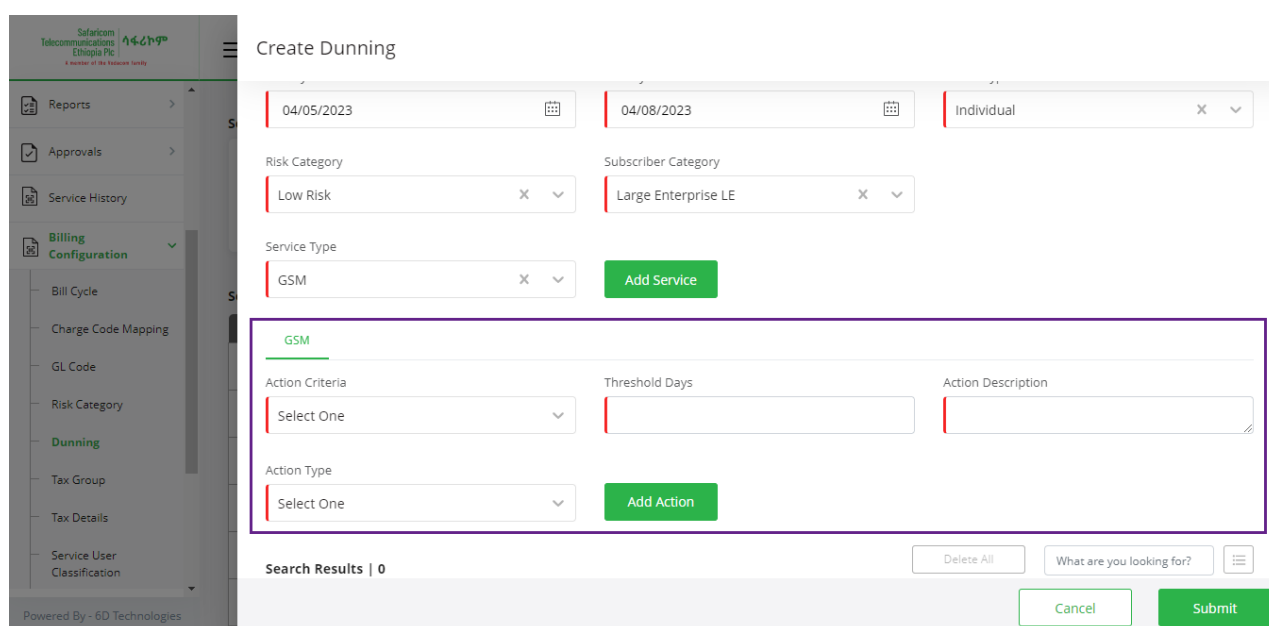

Note: Fields marked with “|” are mandatory. Other fields are optional.

- **| Schedule Name**-Enter the dunning schedule name. For example, you can enter the schedule name as “**Dunning High VIP**”.
- **| Minimum Invoice Amount (Br)** -Enter the minimum invoice amount upon crossing, during which the dunning schedule will be executed. The dunning action will execute

only if the outstanding amount is higher than the minimum invoice amount.

- **Dunning Profile Description** -Enter the description of the dunning profile in the corresponding field.
- **Validity Start Date** - Select the start date of the dunning schedule validity.
- **Validity End Date** - Select the end date of the dunning schedule validity.
- **Profile Type** - Select the subscriber category in the drop-down list. For example, **"Individual"**.
- **Risk Category** – Select the risk category in the drop-down list. For example, **"Low Risk"**.
- **Subscriber Category** – Select the subscriber category in the drop-down list. For example, **"Individual"**.
- **Subscriber Type** – Select the subscriber type in the drop-down list. For example, **"GSM"**.

34. After entering all the details, click **Add Service** button, and the following **Action Details** screen is displayed.

Figure 47 Create Dunning –Actions Details

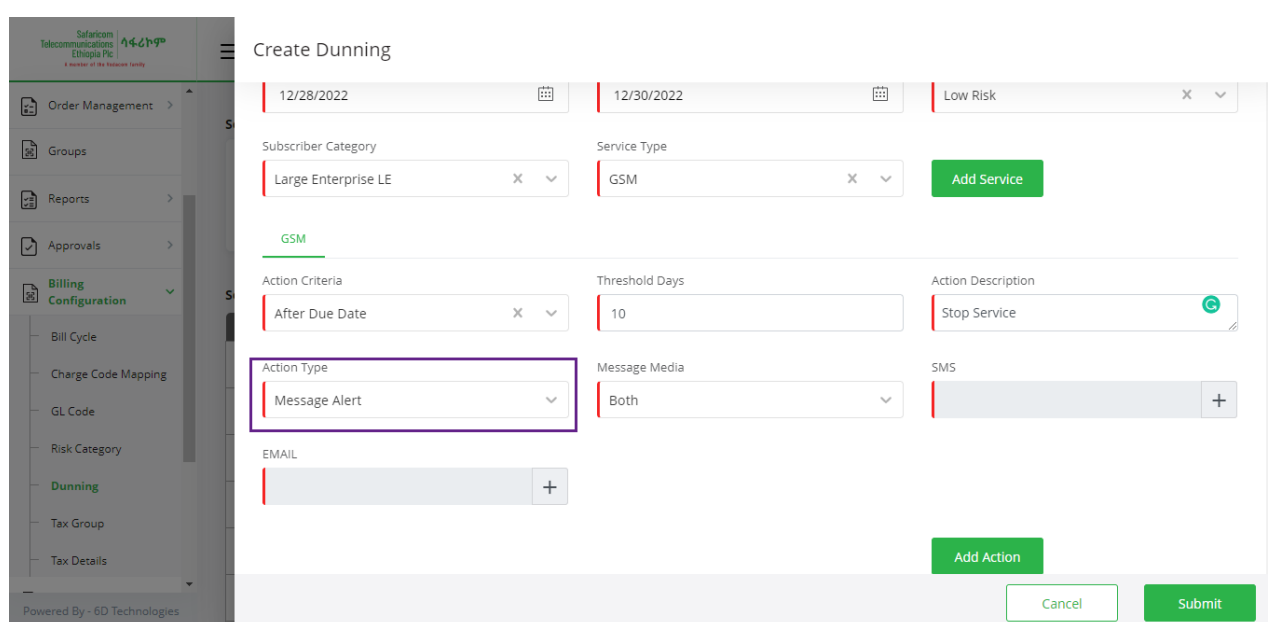

Note: Fields marked with “|” are mandatory. Other fields are optional.

- **| Action Criteria-** Select whether the action should be taken before the invoice due date or after the invoice due date.
 - **| Threshold Days-**Enter the number of days before or after the action should be performed.
- If the action criteria are **before the due date**, then threshold days refer to the number of days before the due date when the action should be performed.
- If the action criteria are **after the due date**, then the threshold days refer to the number of days after the due date when the action should be performed.
- **| Action Description-** Enter a brief description of the dunning action.
 - **| Action Type-** Select the action to be performed in the drop-down list after the specified threshold days.

You can add three types of actions:

- **Messages Alert** – You can send the customer alerts about the payment due.
- **Message Alert with Provisioning** - You can send the customer alert messages about the payment due and perform any dunning action along with it. For example, you can bar all outgoing calls.
- **Provisioning Only** – You can perform dunning at the provisioning level; that is, you can bar all the calls (outgoing and incoming).

The 'Message Media' column shows 'SMS | EMAIL'.

Service	Action Criteria	Action Type	Threshold Days	Provisioning Code	Action On	Delete Action	Message Media	Actions
Hard Business	After Due Date	Provisioning Only	10	HARD_BARRING	First Day Of Month	CREATED/EXISTING	SMS EMAIL	...

- To modify an added action, click the **Modify** button  displayed against the service type. Refer to the following screen.

The screenshot shows the 'Create Dunning' form with the 'Add Action' button. The 'Search Results | 1' table is displayed, showing one record for 'Hard Barring' with a threshold of 10 days and a provisioning code of 'HARD_BARRING'. The 'Message Media' column shows 'SMS | EMAIL'. The 'Modify' button (pencil icon) is highlighted in the 'Actions' column.

Service	Action Criteria	Action Type	Threshold Days	Provisioning Code	Action On	Delete Action	Message Media	Actions
Hard Business	After Due Date	Provisioning Only	10	HARD_BARRING	First Day Of Month	CREATED/EXISTING	SMS EMAIL	Modify

Figure 62 Create Dunning – Action (Options)

- To delete an added action, click the **Delete** button  displayed against the service type. Refer to the previous screen.

40. After confirming all the information, click **Submit**.

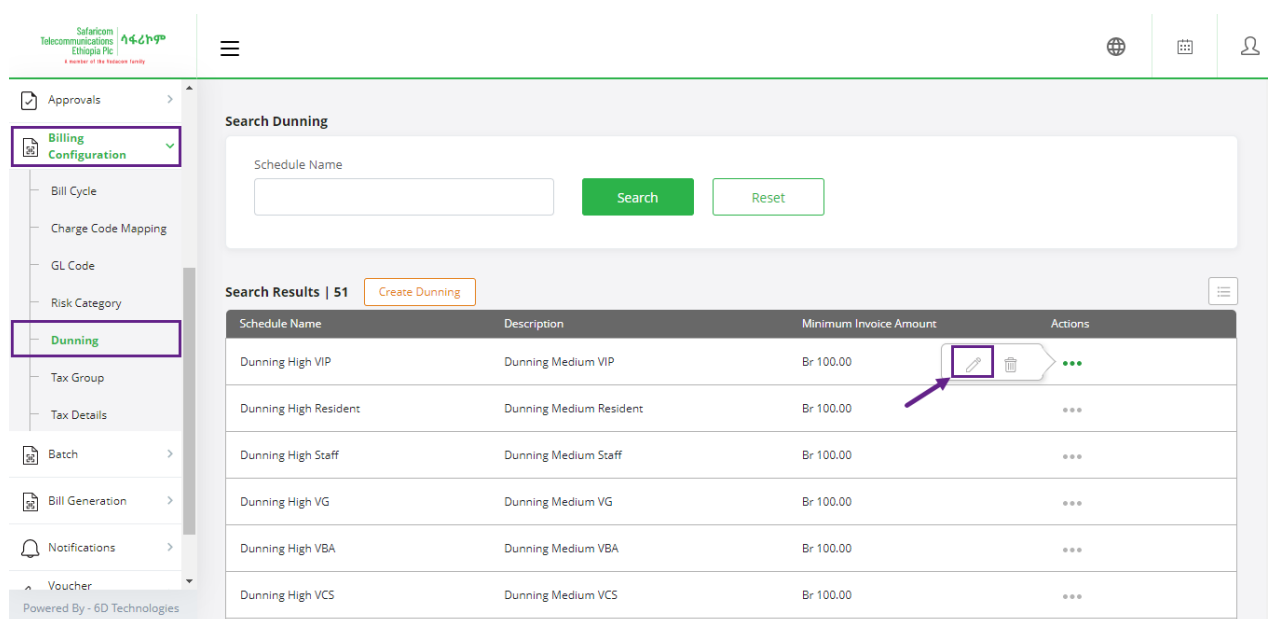

A confirmation dialog is displayed, indicating that the dunning is created successfully.

7.2.2 Modify Dunning

Using this option, you can modify the existing dunning configuration.

To modify a Dunning configuration:

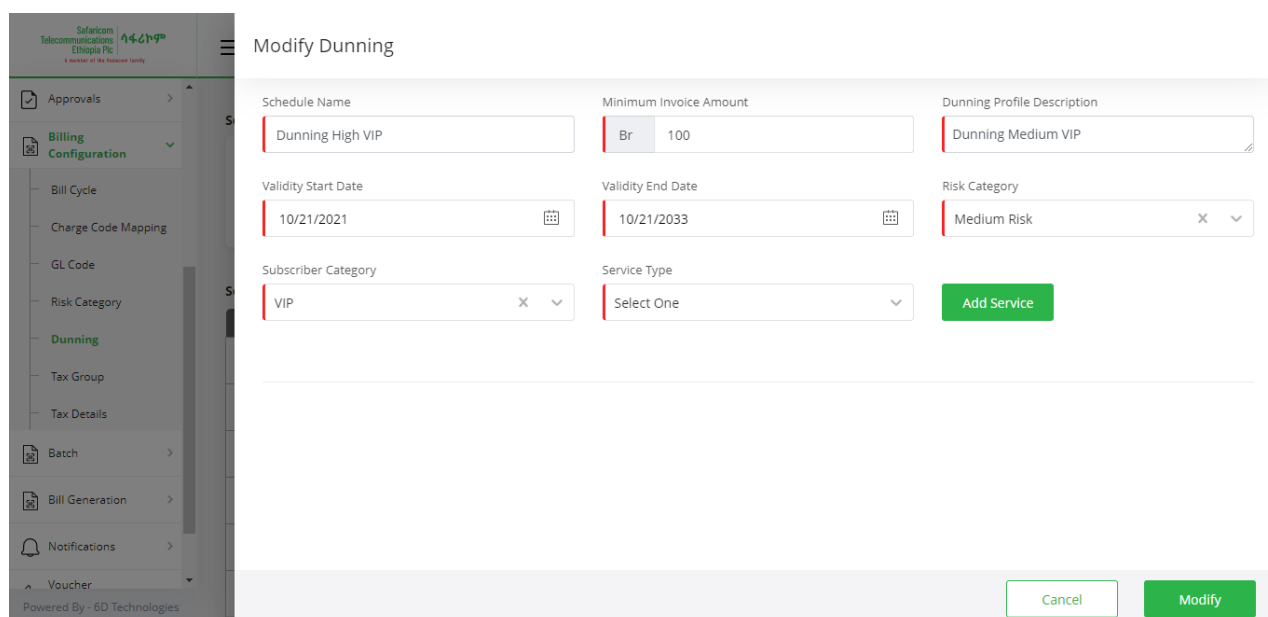

1. On the **Dunning** screen, click the **Modify** button  under **Action** displayed against the dunning profile name you want to modify. Refer to the following screen.

Schedule Name	Description	Minimum Invoice Amount	Actions
Dunning High VIP	Dunning Medium VIP	Br 100.00	  
Dunning High Resident	Dunning Medium Resident	Br 100.00	...
Dunning High Staff	Dunning Medium Staff	Br 100.00	...
Dunning High VG	Dunning Medium VG	Br 100.00	...
Dunning High VBA	Dunning Medium VBA	Br 100.00	...
Dunning High VCS	Dunning Medium VCS	Br 100.00	...

Cancel **Modify**

Figure 64 Modify Dunning Input Screen

42. Modify all the fields on this screen.

43. Click **Modify**.

A confirmation dialog is displayed, indicating that the dunning is modified successfully.

7.2.3 Delete Dunning

Using this delete option, you can delete the existing dunning configuration.

To delete the dunning configuration:

1. On the **Dunning** screen, click the **Delete** button  under **Action** displayed against the dunning profile name you want to delete. Refer to the following screen.

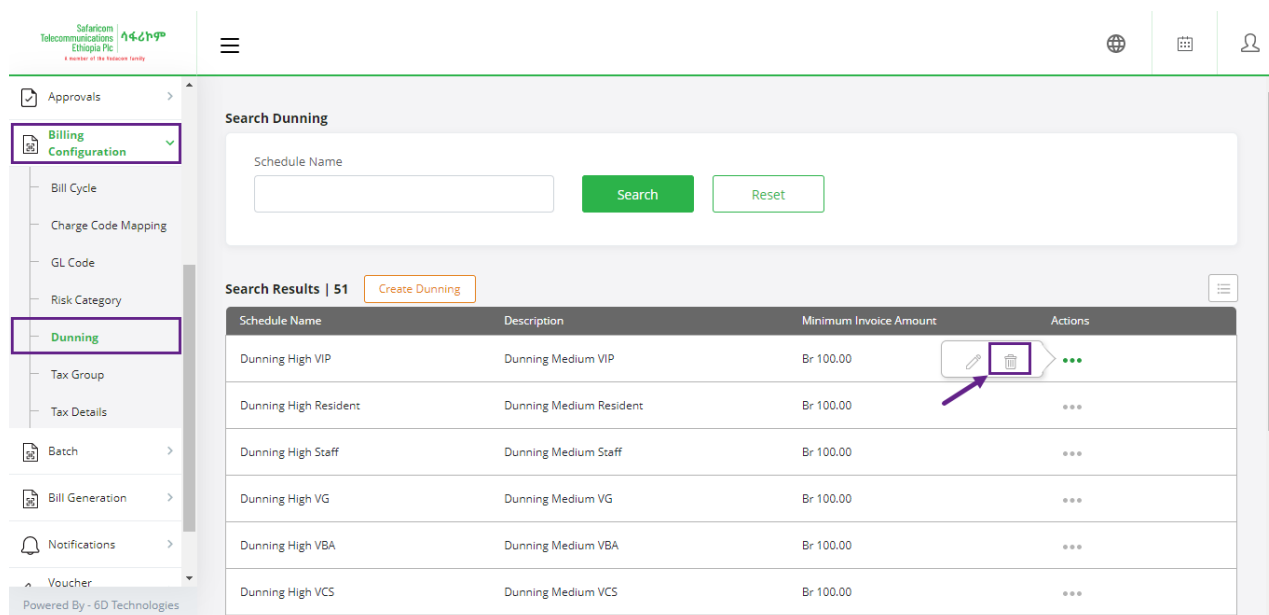

Figure 65 Dunning- Delete Button

44. After clicking the **Delete** button, the following pop-up window will be displayed.

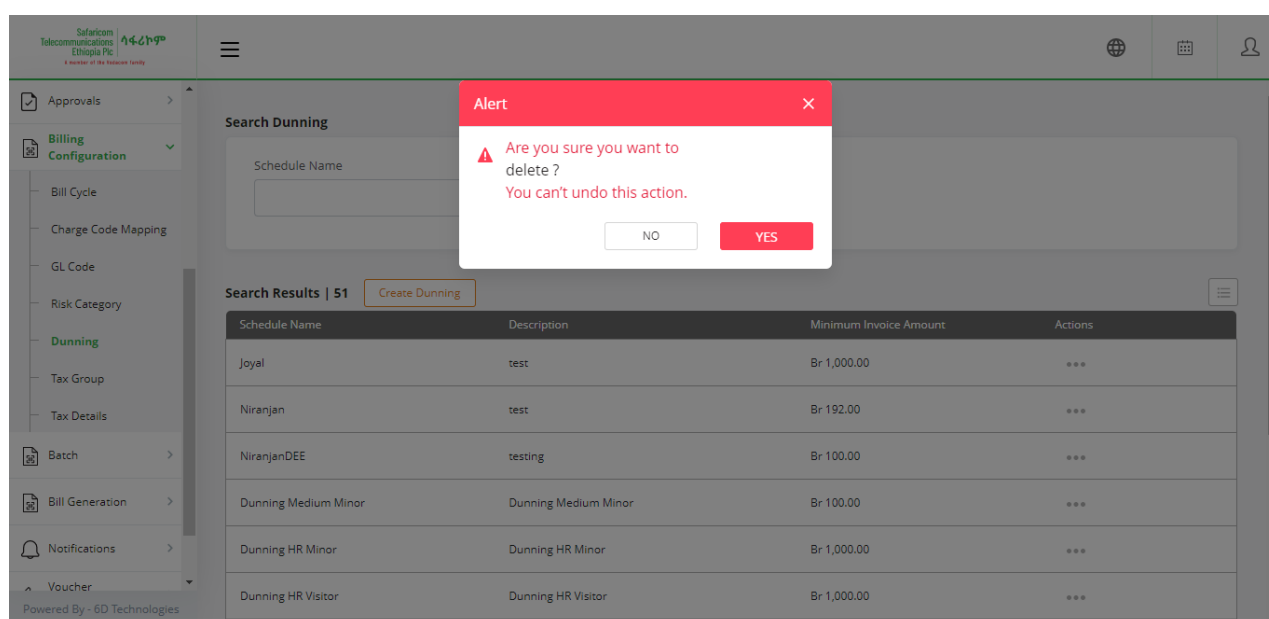

Figure 66 Delete Dunning- Confirmation Dialog

45. If you receive the message, **“Are you sure you want to delete? You can’t undo this action”**, click the **“Yes”** button to confirm the action.

A confirmation message will be displayed, indicating that the dunning is deleted successfully.

Or

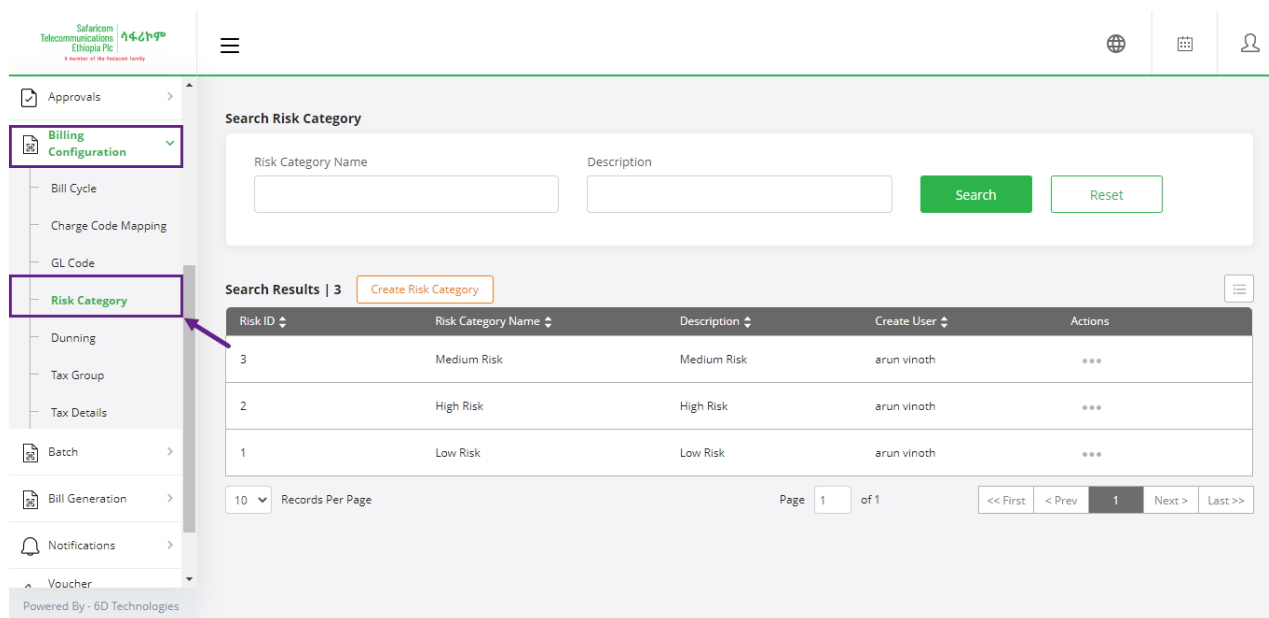

Click **“No”** to cancel the action.

7.3 Risk Category

A risk category outlines the level of risk carried against a customer. You can create multiple risk categories using this option. Once the risk categories are configured, they are assigned to the Billing Account at the time of registration.

To manage the risk category:

1. On the side menu, select **Billing Configuration >> Risk Category** to view the risk category details. Refer to the following screen.

Search Risk Category

Risk Category Name: Description: Search Reset

Search Results | 3 Create Risk Category

Risk ID	Risk Category Name	Description	Create User	Actions

Figure 67 Billing Configuration – Risk Category

7.3.1 Create Risk Category

Using this option, you create a new risk category.
To add a new tax group:

1. On the **Risk Category** screen, click **Create Risk Category** button to add a new risk category. Refer to the following screen.

The screenshot shows the 'Risk Category' screen. On the left sidebar, 'Billing Configuration' is expanded, and 'Risk Category' is selected. The main area has a 'Search Risk Category' section with input fields for 'Risk Category Name' and 'Description', and 'Search' and 'Reset' buttons. Below this is a 'Search Results | 3' section with a 'Create Risk Category' button highlighted. The results table shows three categories: ID 3 (Medium Risk), ID 2 (High Risk), and ID 1 (Low Risk), all created by 'arun vinoth'. At the bottom, there are pagination controls showing 'Page 1 of 1'.

Figure 68 Risk Category – Create Risk Category

46. After clicking the **Create Risk Category** button, the following screen is displayed.

The screenshot shows the 'Create Risk Category' modal form. It has two input fields: 'Risk Category Name' and 'Description'. Both fields have a red vertical bar on the left, indicating they are mandatory. At the bottom of the modal, there are 'Cancel' and 'Submit' buttons. The background shows the same 'Risk Category' screen as in Figure 68, but it is dimmed.

Figure 69 Create Risk Category

Note: Fields marked with “ ” are mandatory. Other fields are optional.

- **Risk Category** – Enter the risk category name in this field. For example, you can enter the risk category “Medium.”
- **Description**– Type a brief description of the risk category.

2. After entering the information, click **Submit**.

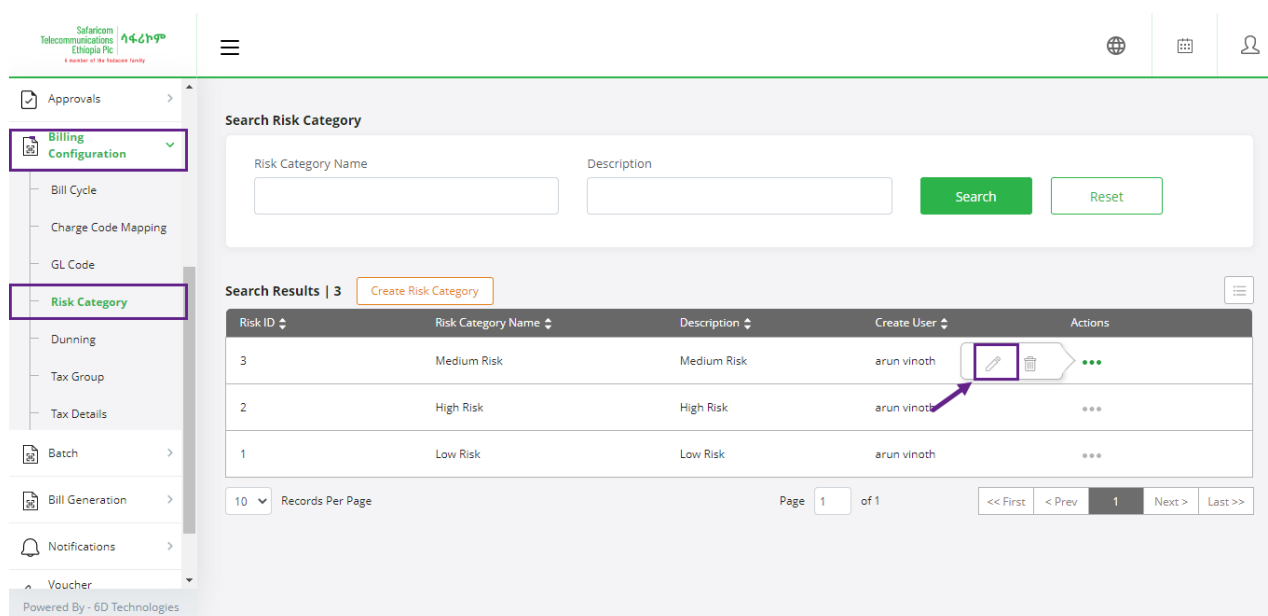

A confirmation message is displayed, indicating that the risk category is created successfully.

7.3.2 Modify Risk Category

Using this option, you can modify the existing risk category.

To modify the risk category:

1. On the **Risk Category** screen, click the **Modify** button  under **Action** displayed against the Risk ID you want to modify. Refer to the following screen.

The screenshot shows the 'Risk Category' management screen. On the left, a sidebar contains navigation items: Approvals, Billing Configuration (highlighted with a purple box), Bill Cycle, Charge Code Mapping, GL Code, Risk Category (highlighted with a purple box), Dunning, Tax Group, Tax Details, Batch, Bill Generation, Notifications, and Voucher. The main content area is titled 'Search Risk Category' and includes a search form with fields for 'Risk Category Name' and 'Description', and buttons for 'Search' and 'Reset'. Below the search form, there is a 'Search Results | 3' section with a 'Create Risk Category' button. The results are displayed in a table with columns: Risk ID, Risk Category Name, Description, Create User, and Actions. The table contains three rows: Risk ID 3 (Medium Risk), Risk ID 2 (High Risk), and Risk ID 1 (Low Risk). The 'Actions' column for Risk ID 3 shows a 'Modify' button (pencil icon) highlighted with a purple box, along with a 'Delete' button (trash icon) and a 'More' button (three dots). The bottom of the screen shows pagination information: 'Page 1 of 1' and navigation buttons for '<< First', '< Prev', '1', 'Next >', and 'Last >>'.

A confirmation message will be displayed, indicating that the risk category is deleted successfully.

Or

Click “**No**” to cancel the action.

7.4 Tax Group

A tax group is a group of taxes. Taxes will be applied while billing. Many tax policies can be added to one tax group. For example, a type of tax can be a state tax of 28%, while another type can be a central tax of 20%.

To search for a particular tax group:

1. On the side menu, select **Billing Configuration >> Tax Group**. The **Tax Group Details** screen is displayed.

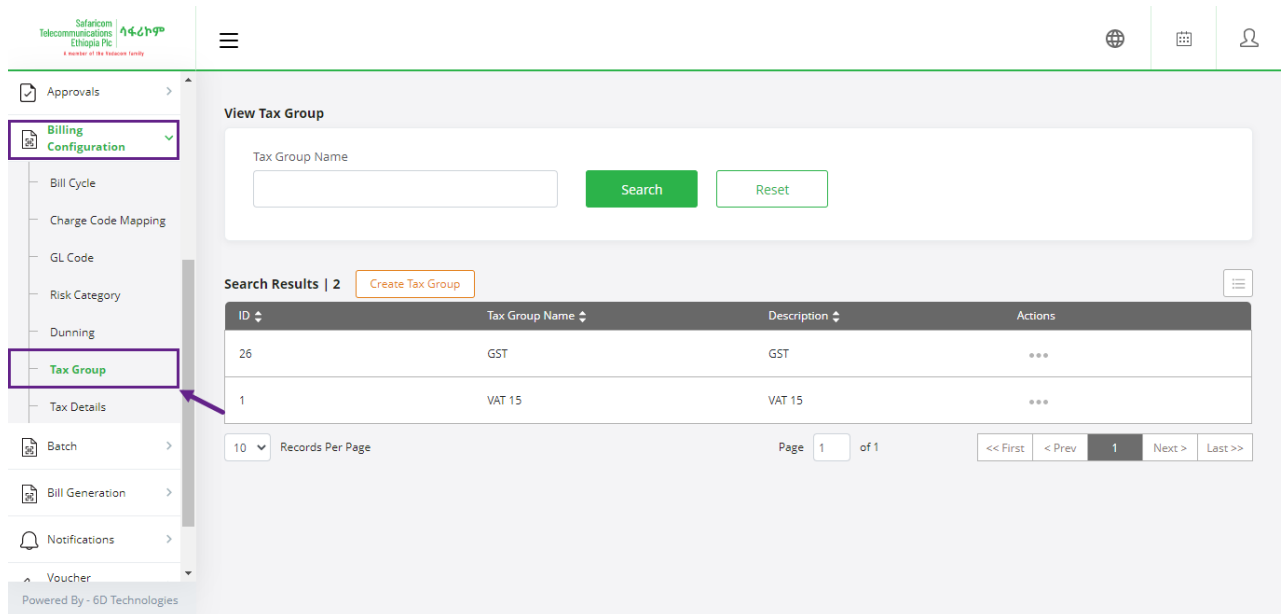

Figure 74 Tax Group Screen

52. You can search for a specific tax group using the **Search** option.

53. You can search based on the tax group name. Enter the tax group name that you want to view and click **Search**.

The result is displayed on the screen based on your search criteria.

7.4.1 Create Tax Group

Using this option, you can create a tax group.

To add a new tax group:

1. On the **Tax Group** screen, click **Create Tax Group**. Refer to the following screen. Refer to the following screen.

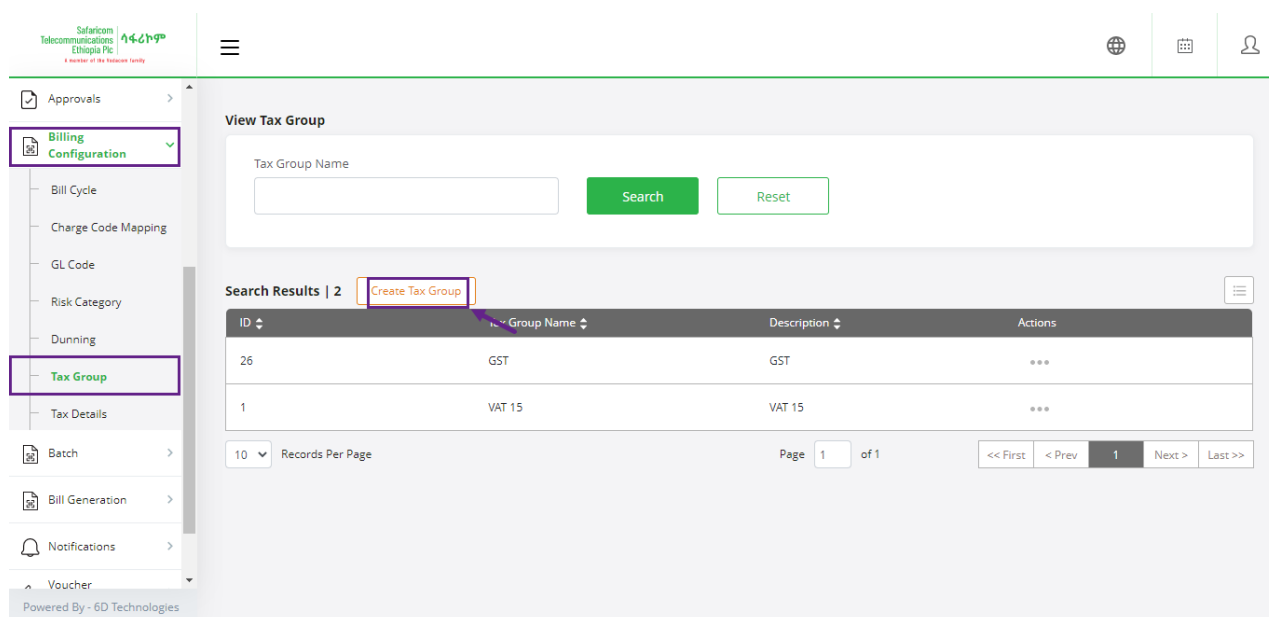

Figure 75 Tax Group – Create Tax Group

54. After clicking the button, the **Create Tax Group** screen is displayed.

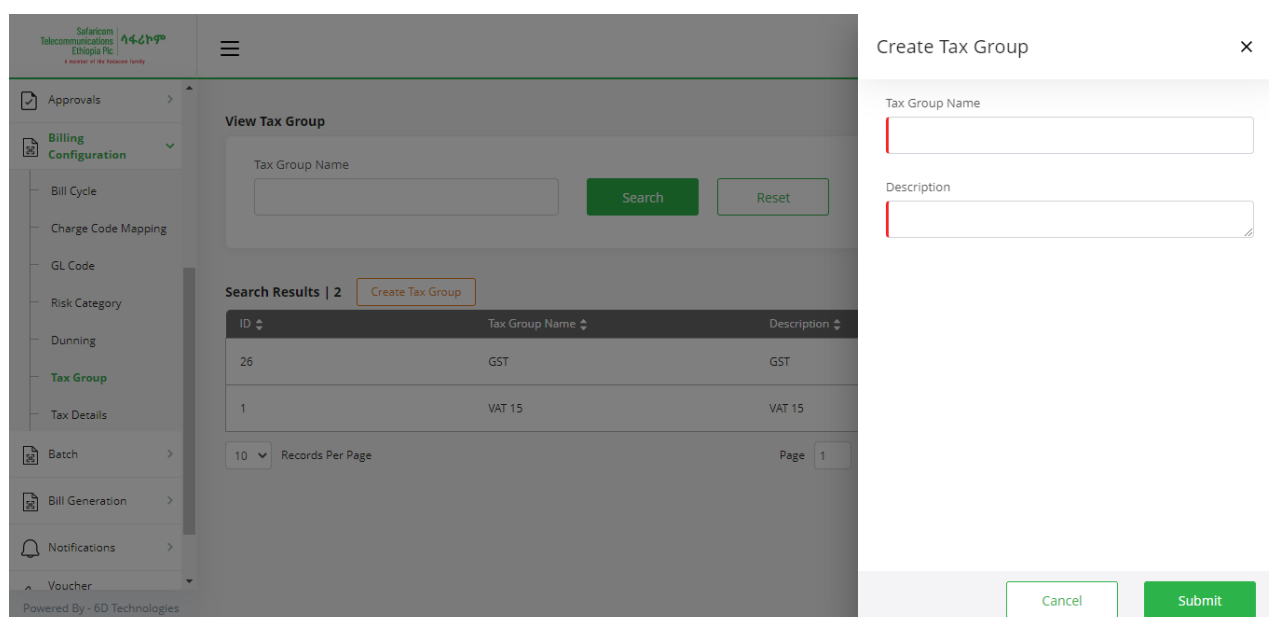

Figure 76 Create Tax Group Input Screen

Note: Fields marked with “|” are mandatory. Other fields are optional.

- **| Tax Group Name** – Enter the name of the tax group.
- **| Description** – Enter the description of the tax group.

3. After entering the information, click **Submit**.

A confirmation message is displayed, indicating that the tax group is created successfully.

7.4.2 Modify Tax Group

Using this modify option, you can modify the tax group details.
 To modify a tax group:

1. On the **Tax Group Details** screen, click the **Modify** button  under **Action** displayed against the Tax Group ID you want to modify. Refer to the following screen.

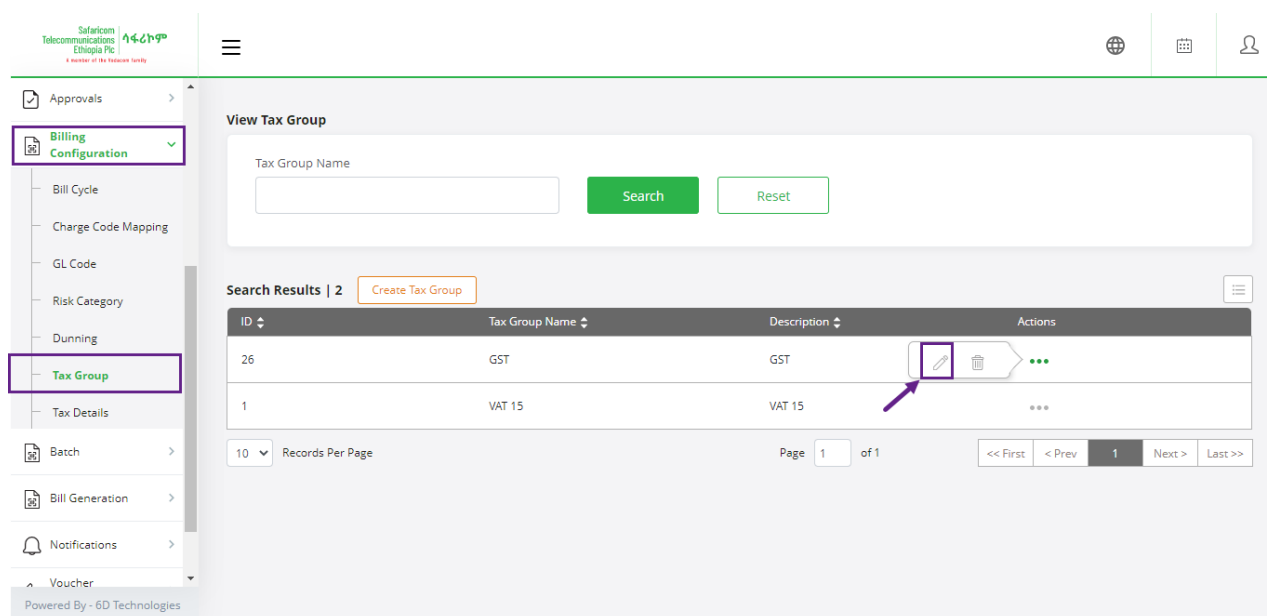

Figure 77 Tax Group – Modify Button

55. After clicking the **Modify** button, the **Modify Tax Group** screen is displayed.

56. You can modify all the fields on this screen.

57. Click **Modify**.

A confirmation dialog is displayed, indicating that the tax group is modified successfully.

7.4.3 Delete Tax Group

Using this option, you can delete the tax group details.
To delete tax group details:

1. On the **Tax Group** screen, click the **Delete** button  under **Action** displayed against the tax group ID you want to delete. Refer to the following screen

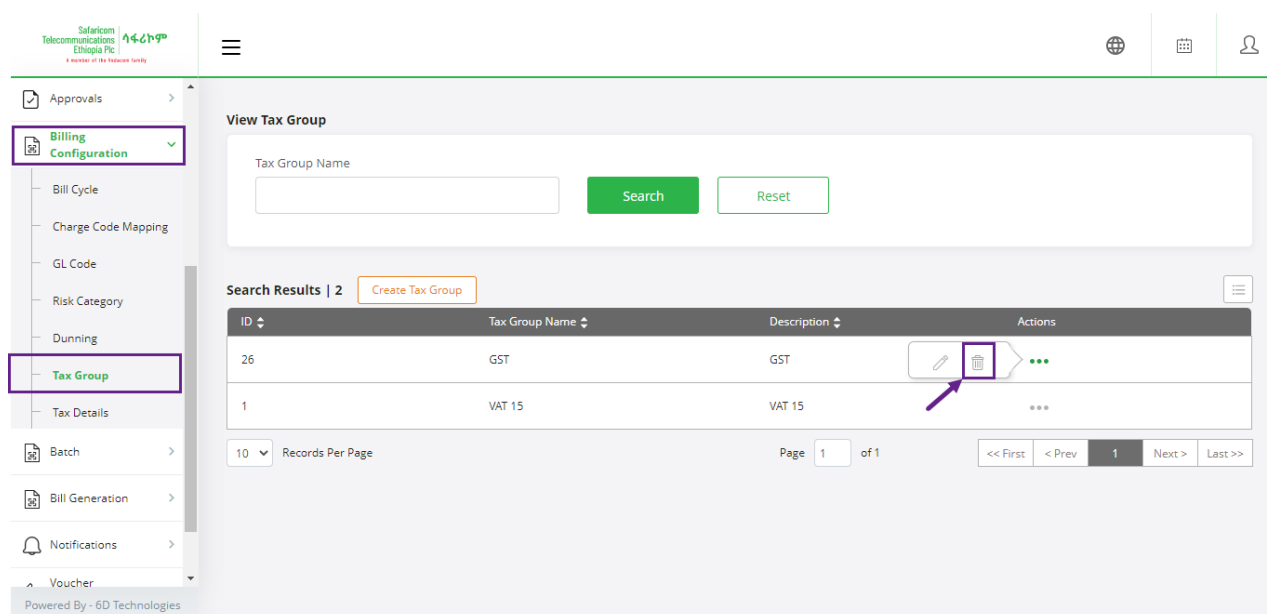

Figure 79 Tax Group – Delete Button

58. After clicking the **Delete** button, the following confirmation dialog is displayed.

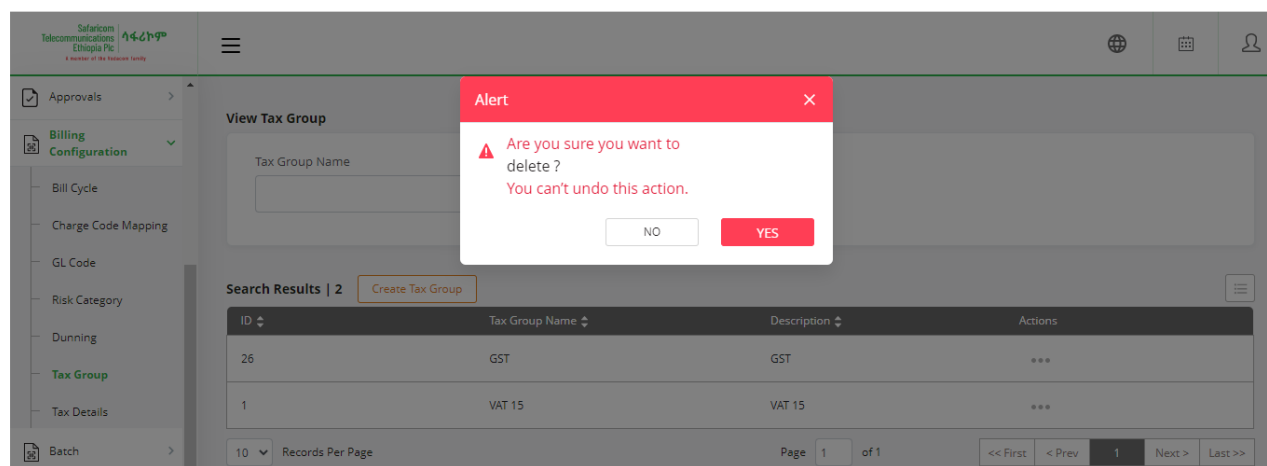

Figure 80 Delete Tax Group – Confirmation Message

59. If you receive the message, **“Are you sure you want to delete? You can’t undo this action”**, click the **“Yes”** button to confirm the action.

A confirmation message will be displayed, indicating that the tax group is deleted successfully.

Or

Click **"No"** to cancel the action.

7.5 Tax Details

Using this option, you can configure tax policies. You can configure tax policies under a specific tax group.

To search for tax policies:

1. On the side menu, select **Billing Configuration >> Tax Details**. The **Tax Details** screen is displayed.

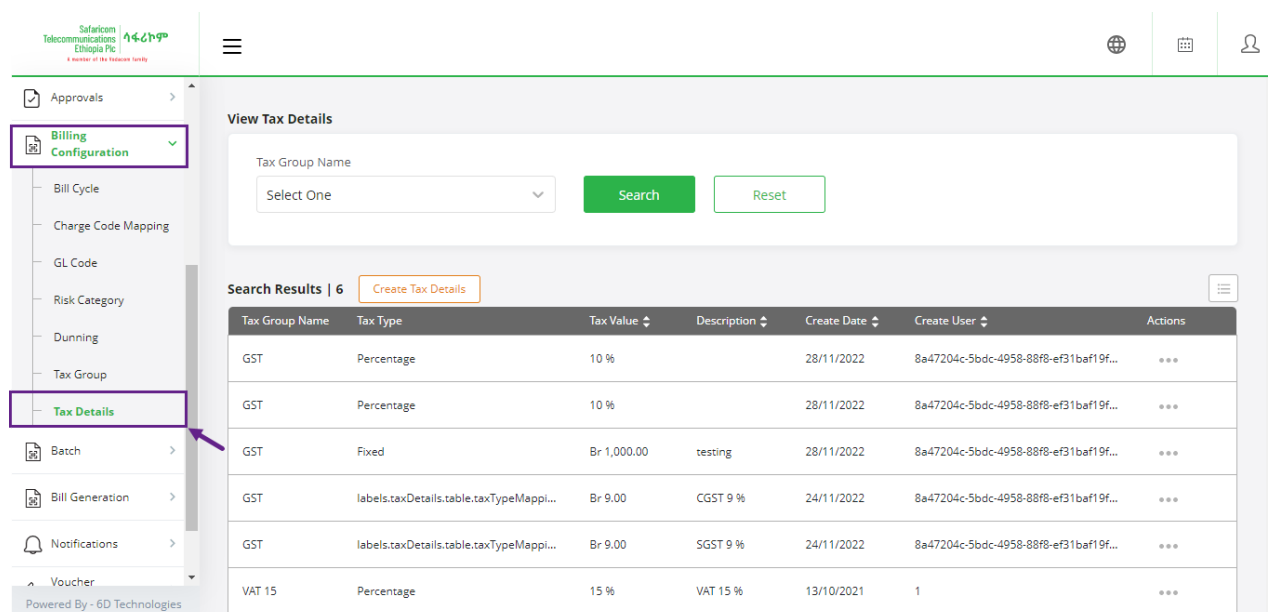

Figure 81 Tax Details Screen

60. You can search for a specific tax using the **Search** option.

61. You can search based on the tax details group. Select the tax details group name you want to view and click **SEARCH**.

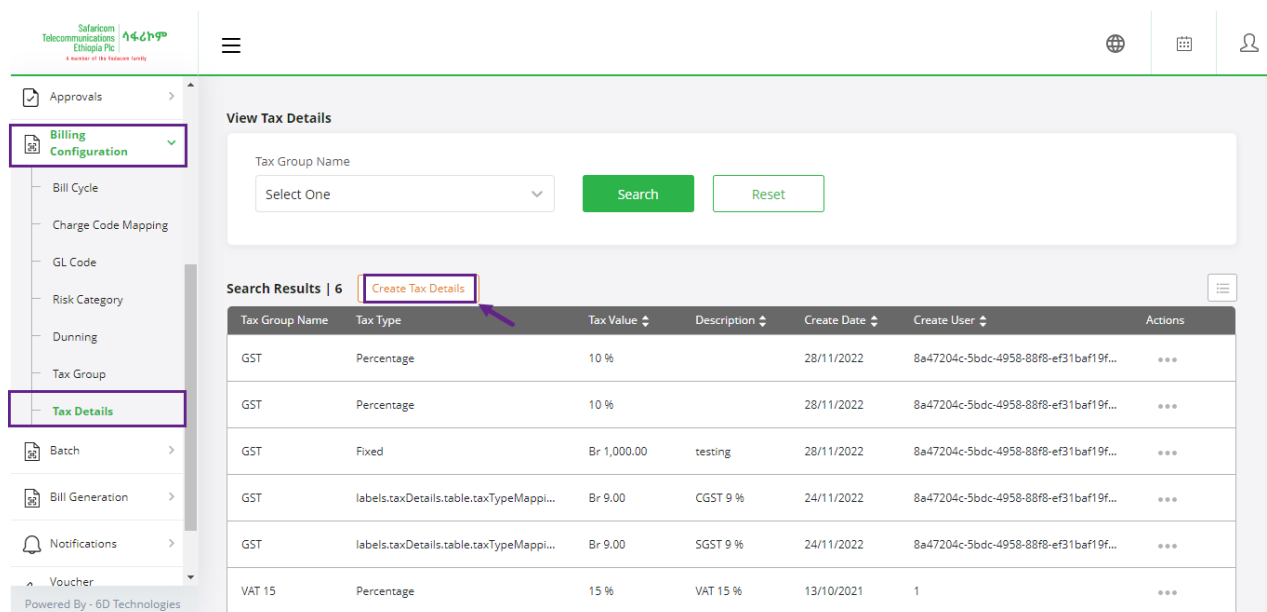

The result is displayed on the screen based on your search criteria.

7.5.1 Create Tax Details

Using this create option, you can create a new tax detail.

To add a new tax policy:

1. On the **Tax Details** screen, click **Create Tax Details**. Refer to the following screen. Refer to the following screen.

67. If you receive the message, **“Are you sure you want to delete? You can’t undo this action”**, click the **“Yes”** button to confirm the action.

A confirmation message will be displayed, indicating that the tax detail is deleted successfully.

Or

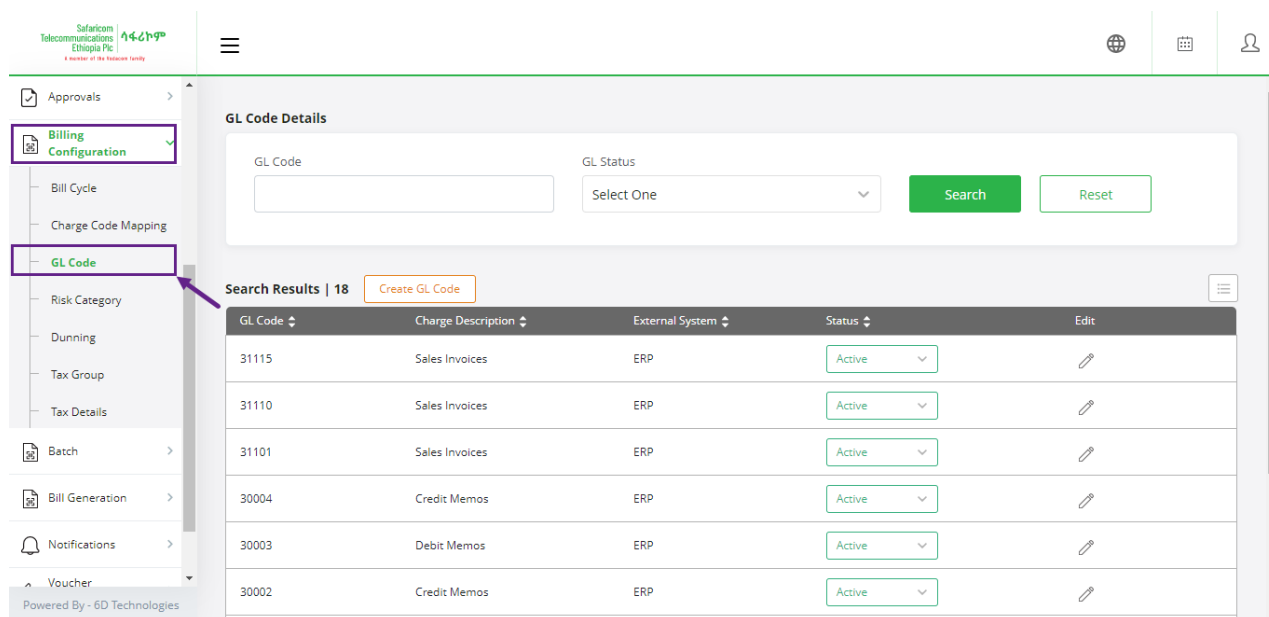

Click **“No”** to cancel the action.

7.6 GL Code

GL code is a general ledger code assigned for each billed financial transaction. When the subscriber activates the plan, the financial transaction will be assigned a unique GL code. If a credit transaction is made, then it is named a credit GL code. If a debit transaction is made, then it is named a Debit GL code. There is also a GL code assigned to every tax transaction.

To search for a GL code:

1. On the side menu, select **Billing Configuration >> GL Code**. The **GL Code** screen is displayed.

The screenshot shows the 'GL Code' screen. The side menu on the left has 'Billing Configuration' and 'GL Code' highlighted. The main area is titled 'GL Code Details' and contains a search form with 'GL Code' and 'GL Status' fields, a 'Search' button, and a 'Reset' button. Below the search form, there is a 'Search Results | 18' section with a 'Create GL Code' button. The results are displayed in a table with columns: GL Code, Charge Description, External System, Status, and Edit.

GL Code	Charge Description	External System	Status	Edit
31115	Sales Invoices	ERP	Active	
31110	Sales Invoices	ERP	Active	
31101	Sales Invoices	ERP	Active	
30004	Credit Memos	ERP	Active	
30003	Debit Memos	ERP	Active	
30002	Credit Memos	ERP	Active	

Figure 88 Billing Configuration - GL Code

68. You can search for a specific GL Code using the **Search** option. You can search based on the GL Code and GL status.

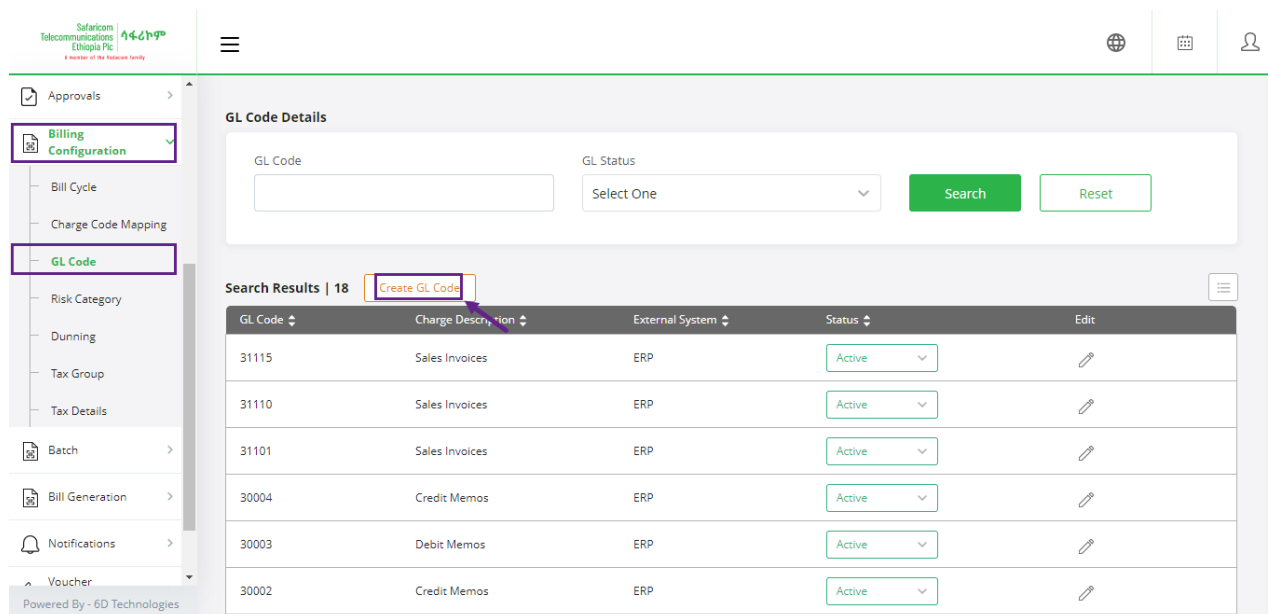

69. Enter or select the search parameters and click **SEARCH**.

The result is displayed on the screen based on your search criteria.

7.6.1 Create GL code

Using this create option, you can create a new GL code.
 To create a GL code:

1. On the **GL Code** screen, click **Create GL Code**. Refer to the following screen.

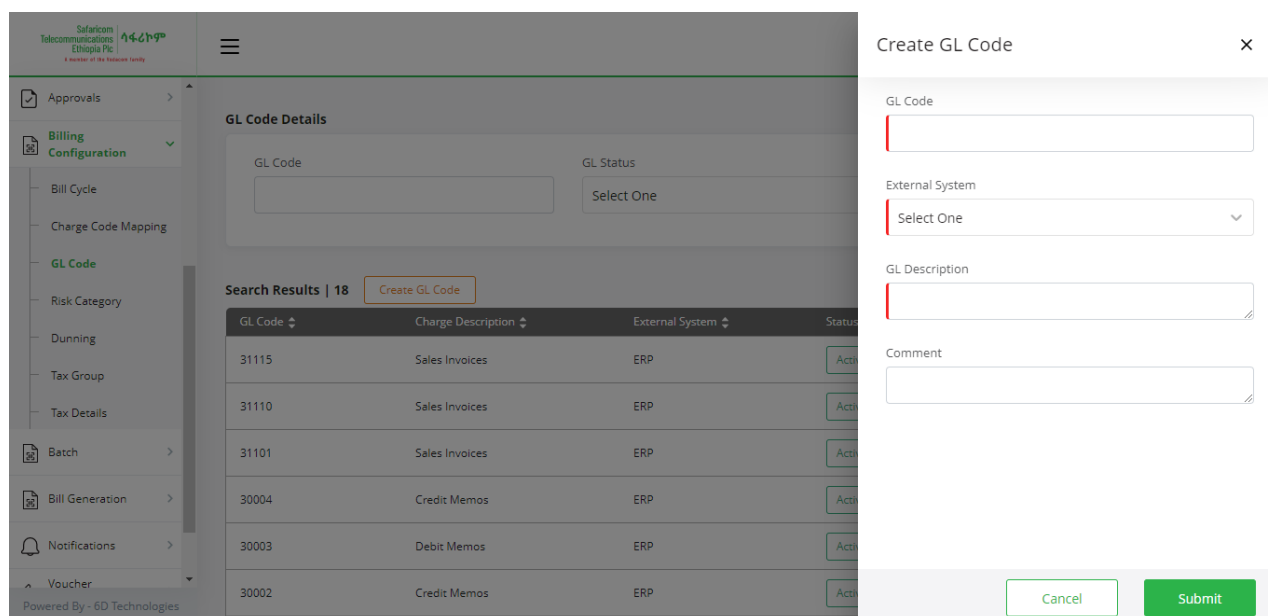

The screenshot shows the 'GL Code Details' screen. On the left sidebar, 'Billing Configuration' is expanded, and 'GL Code' is selected. The main area has a 'GL Code' input field and a 'GL Status' dropdown set to 'Select One'. Below this is a 'Search Results | 18' table. In the table, the 'Create GL Code' button is highlighted in the header row. The table contains the following data:

GL Code	Charge Description	External System	Status	Edit
31115	Sales Invoices	ERP	Active	
31110	Sales Invoices	ERP	Active	
31101	Sales Invoices	ERP	Active	
30004	Credit Memos	ERP	Active	
30003	Debit Memos	ERP	Active	
30002	Credit Memos	ERP	Active	

Figure 89 GL Code – Create Button

70. After clicking the **Create** button, the **Create GL Code** screen is displayed.

The screenshot shows the 'Create GL Code' screen. It has a sidebar on the left with 'Billing Configuration' expanded and 'GL Code' selected. The main area is titled 'Create GL Code' and contains the following fields:

- GL Code**: A text input field with a red vertical bar on the left, indicating it is mandatory.
- External System**: A dropdown menu with 'Select One' as the current selection.
- GL Description**: A text input field with a red vertical bar on the left, indicating it is mandatory.
- Comment**: A text input field.

At the bottom right, there are 'Cancel' and 'Submit' buttons.

Figure 90 Create GL Code Input Screen

Note: Fields marked with " | " are mandatory. Other fields are optional.

- **GL Code**-Enter a unique GL code. For Example, 1289001 or 14346702.

- **External system ID-** Enter the ID of the external system. For Example, the Profit or Loss agent's system code is PL00987.
- **GL Description-** Enter a brief description of the GL code. For Example, This GL code is related to connection charges with credit GL.
- **Comment-** Enter the comment about adding GL code.

71. After entering all the information, click **Submit**.

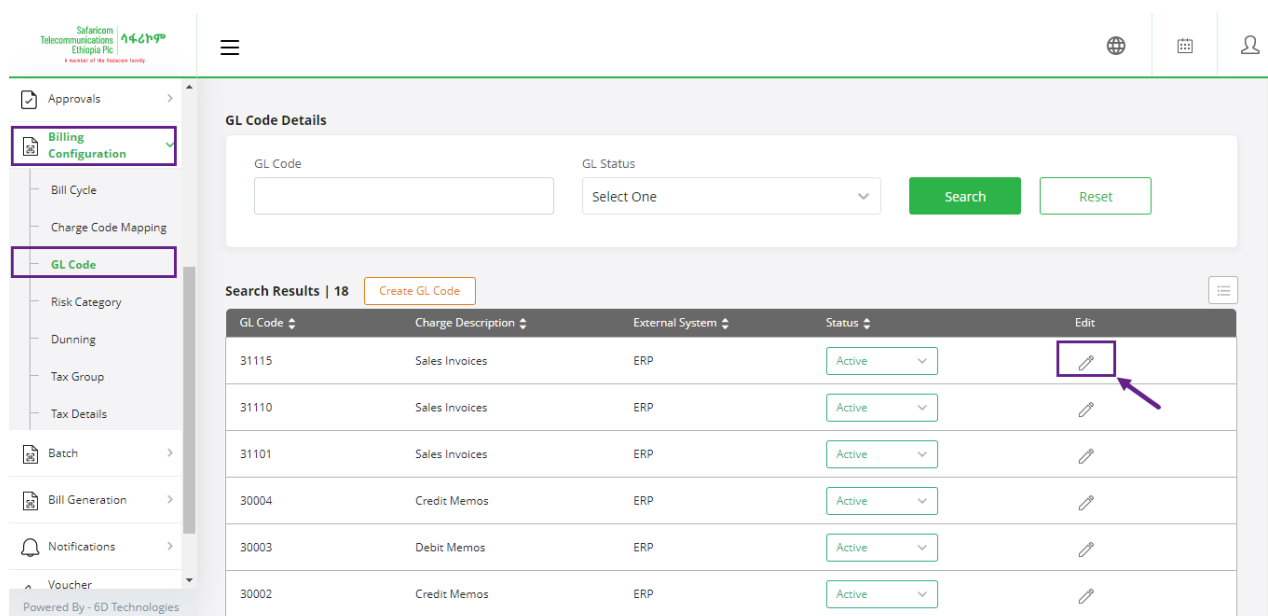

A confirmation message is displayed indicating that the GL Code is created successfully.

7.6.2 Modify GL Code

Using this modify option, you can modify the GL code details.

To modify a GL Code:

1. On the **GL Code** screen, click the **Modify** button  under modify displayed against the GL Code you want to modify. Refer to the following screen.

The screenshot displays the 'GL Code Details' interface. On the left, a sidebar menu includes 'Approvals', 'Billing Configuration' (highlighted with a green box), 'Bill Cycle', 'Charge Code Mapping', 'GL Code' (highlighted with a purple box), 'Risk Category', 'Dunning', 'Tax Group', 'Tax Details', 'Batch', 'Bill Generation', 'Notifications', and 'Voucher'. The main area shows a search bar with 'GL Code' and 'GL Status' dropdowns, and 'Search' and 'Reset' buttons. Below is a 'Search Results | 18' section with a 'Create GL Code' button. A table lists GL codes with columns: GL Code, Charge Description, External System, Status, and Edit. The first row (31115) has its 'Edit' button (pencil icon) highlighted with a purple box and an arrow. The table contains the following data:

GL Code	Charge Description	External System	Status	Edit
31115	Sales Invoices	ERP	Active	
31110	Sales Invoices	ERP	Active	
31101	Sales Invoices	ERP	Active	
30004	Credit Memos	ERP	Active	
30003	Debit Memos	ERP	Active	
30002	Credit Memos	ERP	Active
